CONTAINS NONPLANT FOOD INGREDIENT:

Composition

3.75% Ethyl esters of fatty acids

Directions for Use

AnnGro is a penetrant for use with liquid or water-soluble powdered agricultural compounds. Apply through irrigation systems. Use AnnGro with liquid products volume to volume ratio of 1:1000.

Mixing Instructions

Before mixing: Shake well before measuring out the required volume.

For mixtures with liquid agricultural compounds: Thoroughly mix the liquid agricultural compound directly with the appropriate volume of AnnGro in a suitable container and allow it to stand for 30 minutes before adding the mixture to the mixing tank containing the appropriate volume of water. Agitate thoroughly again before irrigate.

For mixtures with powdered agricultural compounds: Mix the powdered agricultural compound in a suitable container with the minimum amount of water needed to suspend the product. Add the appropriate amount of AnnGro® and thoroughly mix. Leave to stand for 30 minutes before adding the mixture to the tank containing the appropriate amount of water while continuously agitating thoroughly.

Storage

Store the product in a dry cool location. Avoid excess moisture and heat.

Net Volume: 1 liter (33.8 fl. oz)

Expiration Date: _____
