Invisible Condition Alert Program Utah Code 58-1-604

Utah's Invisible Condition Alert Program is a voluntary program that allows a person with a defined "invisible condition"¹ to have a symbol placed on their driver's license or ID card and register the invisible condition into law enforcement's record management or computer-aided dispatch system. The Invisible Condition Alert Program is designed to promptly notify first responders about a person's invisible condition that may directly impact the person's ability to communicate.

As a healthcare professional² practicing in Utah, you are required to make informational resources about Utah's Invisible Condition Alert Program available to your patients in accordance with Utah Code [58-1-604](#).

Your patient with a qualifying invisible condition who wishes to participate in the program must make the request and consent to release of their medical information via signature on the Driver's License Division [invisible condition request form](#) and/or the Department of Motor Vehicles' [statement of invisible condition](#). You, as the patient's healthcare professional, may then certify via signature that the patient has the listed condition. Please refer to each form and/or the respective agency for form submission requirements.
