

YOU ARE INVITED TO AN IN-PERSON SUBCONTRACTOR/ SUPPLIER OUTREACH EVENT JUNE 12, 2025 • 5:00 P.M. (PDT)

Mass. Electric Construction Company (MEC) is preparing to respond to the request for proposals issued by Seattle City Light (a department within the City of Seattle) to provide design-build services for the delivery of the Broad Street Substation Switchgear Replacement Project.

The project includes permitting, design, and construction services to demolish and remove the existing metal-clad switchgear to replace with arc-resistant switchgear compatible with the existing substation infrastructure.

In addition, the scope includes services to structurally infill the existing structure to accommodate the reduced footprint of the new switchgear to match the existing structure and building envelope.

Please join us to learn about the project and anticipated opportunities - and to meet members of our project pursuit team!

MEC is committed to supporting The City of Seattle's objective to provide meaningful subcontracting opportunities for Underutilized Businesses.

Underutilized Businesses for the purposes of this Project include (but are not limited to):

- Women and Minority-Owned Businesses (WMBEs) included in the City of Seattle's Online Business Directory
- Small Businesses (SB) and WMBE's certified by the Office of Minority and Women's Business Enterprises (OMWBE)
- Veteran Owned Businesses certified by the Washington State Department of Veteran Affairs
