Standard Features on All Trailers

✓ **Pinch Drive**

✓ **Removes in 1 Hr**

✓ **No Spilling - Can't Plug**

✓ **12' Side Swing**

✓ **No Metering Doors**

✓ **12" Round Spout**

Pinch Drive - AgriLite's spring tensioned pinch drive system applies pressure to the drive roller to prevent the belt from slipping in wet or freezing conditions, and increases belt life.

Side to Side Swing - Standard on all conveyors, the AgriLite has more side swing than the competition. Fill spreaders or air-seeders without having to move equipment during fills.

Electric, Control Switches - Easily control the conveyor from the back of the trailer with electric switches. Add optional controls at the top of the spout for filling air-seeders and floaters.

Removable - Year Round Use - Save money on maintenance, licensing, & man power by replacing multiple pieces of equipment with this one trailer. Eliminate equipment you only use 2 months out of the year with a trailer that can be used year round. The conveyor easily removes in less than 1 hr with 2 people.

Regulated, No Spill Doors - Our door seals are designed to make unloading a stress-free process. Don't worry about metering your traps, or spilling product under the hoppers & through the transition. Product levelers keep the material from overfilling the belts & spilling on the ground.

Actual Fill Time - 5:35 - with No product left on the ground

No after market trailer modifications

Better resale value than the competition

Multiple trailer sizes available

including, but not limited to:

36' Tandem - *Available in Non-Folding*

37' Tandem - *Available in Non-Folding*

38'6" Tandem - *Available in Non-Folding*

Increased Ground Clearance - 18" at Hoppers

Better ground clearance - easier to remove and install. Our unique ramp & winch system makes it easy to take the lower conveyor on and off. Both conveyors come out in 1 piece. It really is that easy.

12" Spout to handle increased capacity

*Our tube free, aluminum upper conveyor design allows air movement on the bottom side of the belt, and handles more product than before. Move product at 4,000 - 7,000 lbs/min, with no spilling. *Rate depends on product weight*

"My goal when I get out of the tractor is to be back in my seat in 11-12 minutes." ~ Shawn, Scranton, ND

16' Spout Clearance

The Best reach on the market! Allows you to fill at a more ideal angle, to prevent any rollback.

12' of Side Swing

"Trust me, I've had all the rest. I used to fill my deepbander with a Brandt conveyor. I've used the other trailers that are out there. This trailer is by far the best." ~ Ryan, Alexandria SD

Over 12' of Horizontal Swing

Cut your fill times by eliminating the need to reposition equipment. AgriLite offers more swing than the competition.
