

Greener Grounds

**Sports Turf Contractors
and Machinery Hire**

Over 50 years of experience in the turf management industry

0151 321 5734 | www.greenergrounds.co.uk

Greener Grounds are passionate about turf management.

Our established hire business, based in the NW, operates across all the UK.

We take pride in our work and reputation giving our many clients a professional, efficient and friendly service. Our extensive equipment inventory comprises the latest technologically advanced ground machinery available, all tailored to promote either fine turf surfaces or maintenance of large area sports fields. We have over 50 years of experience in the turf management industry and are fully qualified and insured to carry out any of the services we offer.

With cash flow restraints, it is not always advantageous to purchase new, but more cash friendly to hire in when needed.
That is our business.

We have assisted many well known golf courses, football clubs, rugby, cricket outfields, bowling clubs etc to provide their staff with the right tools to present quality turf surfaces.

Equipment consists of:

- Toro Procore 648
- Verti drain
- Imants Sandcat
- Imants Shockwave
- Vredo compact seeder 75mm
- Vredo super compact seeder, 'double disc' 35mm
- Air2g2
- Air1
- Top dress spreader
- Scarifying/leaf collection
- Root Pruner
- Uni Rake
- Drainage

See our website www.greenergrounds.co.uk for prices and quotes.

Air2G2

The Air2G2 from the USA is the best machine to give your compacted greens what they need - air.

Self propelled Air Injection to 25cms deep

The Air 2G2 is a self propelled hydrostatic drive three probe air injection machine, injecting compressed air to either 7" or 10" deep (depending upon probe fitting). This causes a fracturing effect of the compacted rootzone, with no surface disruption.

Air is injected vertically and horizontally over an area of 5ft (1.5m) to 10" (25cms) deep. Self contained three wheel, Kohler 19hp petrol engine, hydrostatic drive axle, steered by the handles, move forward or reverse. Ingersol Rand two stage compressor. All processes automatically controlled by the push of a button, and setting of computer pad. Ideal for use on fine turf throughout the growing season with no interruption to play.

The Air2G2 can be used to relieve compaction on various places and various grounds, we can aerate anything from Football and Rugby pitches, golf and bowling green's all the way down to walkways and pathways to improve your drainage.

We can offer one off aeration or annual packages allowing you to spread the cost over 12 months.

Toro ProCore 648

If the Air2G2 is not for you and you need to hollow core, then how about the Toro ProCore 648?

Winning over so many UK greenkeepers is the Toro ProCore 648 pedestrian aerator.

From the innovative wheels within the coring path, to the large 48" (122cm) aeration swath, there's nothing ordinary about the ProCore 648 aerator. Years of research, customer input, testing and attention to detail went into making the ProCore 648 the most productive and efficient walking aerator on the market.

The ProCore 648, as with all Toro aerators, leaves a clean, even finish that allows operation on fine turf with the absolute minimum of disturbance and gets surfaces back into play quickly.

Fitted with a head drive system that uses precision balancing weights, similar to those found on a six-cylinder engine, on each coring head, this configuration eliminates hopping, rocking and uncomfortable vibration. From the innovative wheels within the coring path, to the large 122cm aeration swath, the ProCore 648 is one of the most productive and efficient pedestrian aerators on the market.

Features

- No crushed cores
- Higher productivity
- Contour following system
- Easy and safe to operate
- Deeper holes

Vertidrain Charterhouse 7215

Reduce compaction in any ground conditions.

Building on the tradition of innovative excellence, the Verti-Drain 7215 incorporates the technology of the second-generation line with new and improved features. The 7215 boasts a working width of 61" (1.56m) and can aerate up to 10" (250mm) maximum, making for greater productivity when fit to a 25 hp tractor. The 7215 offers reinforced front and rear rollers, as well as a lighter frame than the 73 series, thus having lower horsepower requirements.

Unique adjustable parallelogram forced heave

Shatters compaction in any ground conditions. Versatile with single-point adjustment for optimum results – solid or hollow coring.

3-speed gearbox

Matches your tractor's ground speed exactly to achieve desired hole spacing. Creep speed tractor gear not essential.

Vredo Disc Overseeder

Over Seeding this year? How about using a Vredo 214 Compact or our Vredo double disc?

Vredo - 75mm or 35mm spacing accurate and efficient mounted seeders for compact tractors. The Vredo Compact Series seeder is an accurate and efficient range of disc seeders designed for overseeding golf greens & tees, sports pitches and other amenity grass. Seed is placed in a V-shaped slit, at a pre-set depth of between 5mm & 25mm deep, directly in contact with the soil for maximum germination rate. The slits are then closed by a compaction roller and a level surface re-established.

Proven 97% germination success rate.

Sandcat

***Do you have any problem greens – wet and spongy
which need firming up?***

Do you suffer from footprints in the winter?

**We can solve your problem greens overnight using our Imants Sandcat machine
– the best in the business.**

The Imants Sandcat moves lightly over the turf, slitting the surface and introducing kiln dried sand to 5" depth to improve drainage and surface firmness and enhance the properties of the root zone. The machine's compact size enables it to be used with compact tractors, being ideal for greens, as well as tees, sports fields and football pitches.

***This machine can be hired from us fully operated on a daily
basis (long enough to change 3 average sized greens)***

using the services of two professional staff from Greener Grounds + tractor.

Dakota Top Dress Spreader

The Dakota 410 is the only top dresser that can be adjusted on the fly to spread heavy or light, wet or dry materials precisely and without guesswork.

The Dakota 410 is specially designed for the fast transportation & application of top dressing. It will handle both wet and dry materials, allowing light to heavy dressing. It features accurate and easy to operate calibration system. Ideal for use on golf courses and sports fields. The 410 features Ultra Trac turf tyres, A-Frame hitch with adjustable height and dual spinner discharge system.

Spread light, heavy, wet or dry, nothing is easier to use or adjust than a Dakota Turf Tender.

Specification

- Model - 410 Towed
- Spreading width - 3.5m - 13.0m (dependant on tractor oil flow)
- Hopper size - 0.91m (W) x 1.93m(L) x 0.36m (deep) 1.27m
- Hopper load height - 1.27 mtrs
- Hopper capacity - 0.65m³ (level) - 0.76m³ (heaped)
- Vehicle of approx 20hp min with towing capability
- Hydraulic rear door shut-off
- Rear mounted cross conveyor / 15cm hopper ext.
- 2 x Ultra Trac 26.5 x 14 x 12 Tyres

Shockwave

The Imants Shockwave is a linear decompactor, designed to revitalise heavy wear areas by relieving soil compaction, improving aeration and removing surface water.

The Imants Shockwave is reputed to be the world's fastest PTO driven rotary, linear decompactor. The 155 model is designed for mid-range tractors, and for use on fine turf and sports fields. As with all Shockwave models, it features a no-chains, direct drive design, maintenance free "sealed for life" bearings & no shearbolt.

Raycam UniRake

The Raycam UniRake is designed for and by leading groundsmen to accurately maintain natural and synthetic grass including hybrid surfaces. The UniRake offers high intensity grooming that can be calibrated in its severity.

Specification

- Working width - 2.00mtrs
- Length - 1.80mtrs
- Number of tines - 136
- Tine length - 1337mm
- Weight (approx) - 265kgs
- Power requirement - 35hp+
- Options - Removable tine bars

UniRake

Shockwave

Air1

***Hard pan deep underneath your greens?
This machine gets through it for improved drainage.***

Brand new technology on the market.

The Air1 works by injecting compressed air into the soil profile, using an operator controlled hammer to insert the single probe to the desired depth. All run from a bespoke tractor mounted compressor system with carry cradle. The all new AIR 1 drills down to 18 inches with a 1 inch diameter tine, you can then either leave the hole open to close over naturally or use a funnel and kiln dried sand to fill. This will then keep the space open underneath to get the water through the profile and keep the area drier.

Imants RootPruner

Prevent tree root encroachment - cuts 4 inch roots with ease down to a depth of 12 inches.

The Imants RootPruner prunes roots up to 100mm in diameter with no clean up. It can prevent root encroachment under vital areas, eliminating loss of valuable water and nutrients and prevent surface damage. It also has the ability to decompact tight, narrow areas with ease. Includes unique patented triple-reduction planetary gearbox, for smooth, maximum torque drive to rotor shaft. The RootPruner also features a factory set, torque limiting PTO shaft eliminating all shear bolts & spring clutches.

Specification

- Working width - 0.60m
- Transport width - 0.90m
- Working depth - 250mm
- Number of blades - 6
- Blade thickness - 15mm
- Blade spacing - 270mm
- Weight (approx) - 415kg
- Power requirement - 40 - 60hp
- Tractor requirements - 540 PTO. Creep gear or hydrostatic drive required
- Operating Speed - 0.3 – 0.75mph (0.5 – 1.2kph)
