Bay City Mini Mix Enterprises PTY.LTD.

T/A

Bay City Concrete & Haulage

To our valued customers,

Due to the large volumes of excess concrete that we are having sent back to our depot, we are no longer able to absorb the cost of transport and disposal of leftover concrete.

Unfortunately, this means we are having to implement an environmental disposal fee for concrete returned from site to our depot.

A disposal fee of \$50 per cubic meter, or part thereof, plus GST will be charged and will apply when quantities over 1.0 cubic meter are returned.

This charge does not apply to concrete returned to the depot when the quantity is under 1.0 cubic meter.

The environmental disposal fee will be charged and is payable in a similar manner that waiting time is calculated and charged. Cash sales will be required to pay the Environmental disposal fee upon completion of discharge of the concrete from the truck, account customers will have the additional charge added to the invoice for the job/load.

The new fees will come into effect as of the 1st March 2025.

If your company issues purchase orders, please ensure there are provisions for possible Environmental disposal charges on purchase orders.

If you have any queries or concerns about the new charges, please contact us on the details above.

Regards Accounts,
Bay City Concrete and Haulage
