

Bagasse Food Containers

Meal Boxes made from sugarcane fibre

Bagasse is a robust food safe material that can be used in a microwave. Versatile and extremely strong, bagasse containers are hygienic and offer attractive presentation for hot and cold foods. The stackable meal boxes take up very little space and are easy to fill and close. The containers are recyclable, compostable and biodegradable and thereby less harmful to our environment so they have our seal of approval as an eco friendly food packaging product.
