BA-08Z

Bundle Banknote Acceptor

Performance

Effective Validation

- First acceptance rate > 99%
- Complied with financial industrial standard
- Bundle banknote acceptance accelerates transaction and brings better user experience
- High processing speed < 2 s/note
- Full surface CIS scanning & multi-line magnetic detection effectively resist counterfeit.

Security and Reliability

- Anti-stringing design prevents fraudulence
- Impact-resistant cash vault ensures cash security
- Software online upgrading rapidly embarks on latest counterfeit.

Compact Structure

- Highly compact structure effectively saves space

Low Maintenance Cost

- Enclosed transport unit effectively prevents dust, accomodates harsh environment
- Cash vault is designed with sight glass to find out bill jam.
- Solve bill jam in need of no professional tools
- Non-electric design makes cash vault more durable
- Industrial part features long service life

Specifications

Bill Insertion

- Bundle lengthwise insertion in 4 ways
- Note QTT in 1 transaction : 30 max.

Detection

- Full surface CIS scanning & multi-line magnetic detection
- Processing speed < 2s/note

Denominations and Dimensions

- Simultaneously accepts 100 denoms.
- Length range: 120~170 mm;
- Width range: 62~85 mm.
- Thickness range: 0.06~0.18mm

Capacity

- Cash vault : 1000/2000 notes
- Escrow : 1 note

Maintenance Direction

- Front access

Power Supply

- DC24V , 5A (max.)

Communication Interface

- RS-232 or USB

Weight

- 1000 notes: 4.2kg(total), 1.2kg(vault)
- 2000 notes: 6.8kg(total), 2.2kg(vault)

Environment

- 0°C~50°C , 20%~90%RH

MCBF

- > 100,000 cycles

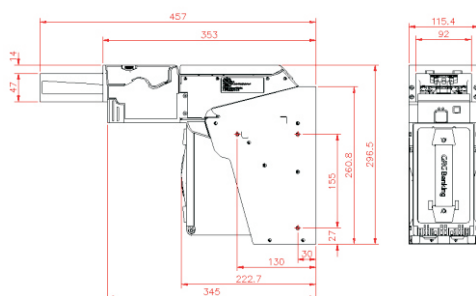

Multiple detection ways

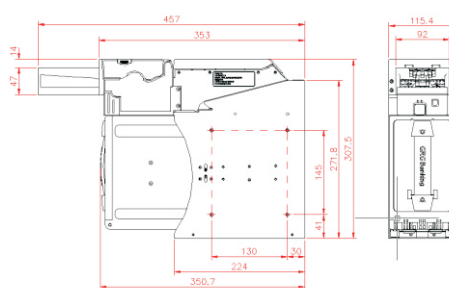

Easy solution of bill jams
