

CM Compact Series

Intelligent Banknote Sorting Machines

More Compact

Reliable Quality & Durability

Faster Speed

Easier Maintenance

Enhanced Multi-currency

CM200V (compact), CM300 (compact), CM400 (compact) are newest release of GRG's sorting products, balancing productivity, cost, dimension & maintenance, are ideal cash sorting solution for CIT, banks. GRG unveils new design concept to adapt development trends of sorting business, to make more robust products as well. Not only does it inherit traits from former generation but also absorbed new ideas from market. Real time status & record (including optional OCR) integrated with management/surveillance system help to realize purposive, centralized management. Android, escorted Google's long-term support, whose anti-virus strategy ensures stability & safety, emerges as an excellent choice because of its advantage in open source & underlying development & virus defending, has become a long-term strategy of GRG technology roadmap.

CM Compact Series Intelligent Banknote Sorting Machines

CM200V (compact), CM300 (compact), CM400 (compact), integrated with comprehensive hardware & software solution, require even smaller space to deliver their powerful functionalities. banks & CIT will benefit from their reliable cash handling service at a higher speed, that is, 780-1,100pcs/min.

Precise Cash Processing

- Involve state-of-art identification and verification technologies to make new generation sorter more effective and efficient. Flexible sorting schemas makes it possible to achieve business requirement from bank branches in one sorting transaction

Optimum User Experience

- 4.3-inch touch screen and interactive operation make the interaction more convenient and instinctive
- Innovative compact design generates more stable, smaller, lighter new devices
- Multi communication interfaces make it easy to extend external devices, such as LCD, printer, etc.
- Two reject stackers distinguish reject notes from counterfeits (only for CM400 compact)
- Brand-new noisy control technology

effectively decreases the noise

- A shining smile lights up your mood

Sorting Report Management

- Support integrating with backstage management/surveillance system to track sorting record & to trace each banknote, to realize centralized management
- Customer could check sorting report on machine or export them to external devices like flash disk, other storage device as well for further analysis
- Connect with printer for instant sorting report printing (configurable)
- Recognize and store OCR in sorting record (optional)

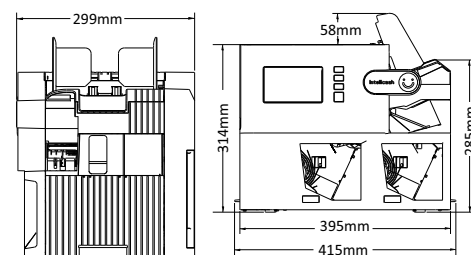

Convenient Maintenance

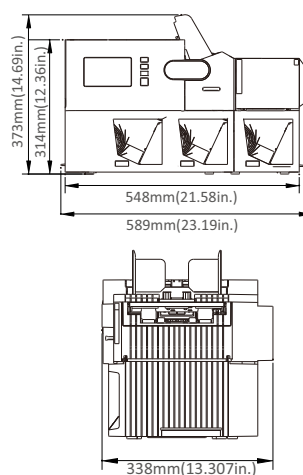

- Ergonomics design, horizontal stacker in favor of users' operation
- Users have full access to banknote transport to remove jammed notes and conduct cleaning
- Support remote updating and diagnosis (optional, cooperated with management system)
