CM200V

Intelligent Banknote Sorting Machine

Intelligent NV	Productivity Powerful	Easy-to-use
Desktop Model	Sorting Management	Reliable Quality & Durability

CM200V is a desktop model for cash processing in retail & bank branch, which requires little space meanwhile delivers various functions. Its intellegent authentication technology & delicate note validator make sure the accuracy of cash processing. Users will benefit from its flexible sorting configuration with due consideration given to productivity, and its achievable in occasions where need integrate with backstage management system to trace sorting transaction, and each banknote as well.

CM200V Intelligent Banknote Sorting Machine

Innovative cash sorting technology from GRGBanking:
CM200V is the ideal cash counting and sorting solution for banks, retails and CITs.

Features

Precise Cash Processing

• Featured with **professional and comprehensive banknote authentication technology** which supports IR, UV, magnetic, thickness detection and CIS (contact image sensor), CM200V is able to detect soiled, stained, taped, torn and dog-eared notes.

• The **OCR technology (opt.)** realizes the capability of serial number tracking on CM200V, the serial number can be recorded in the PC, and both sides' image of each note will be kept on an optional image recorder.

Optimum User Experience

• **5-inch touch screen plus function keys** facilitate user's operation on the machine.

• **High brightness digital display** indicates the banknote number in the stacker.

• With **operation hopper**, user can keep feeding the notes.

• The **USB, RS-232 and LAN interface** extend the connectivity of CM200V, so it can be connected with external LCD, printer and PC for sorting report checking, printing and upgrade, to realize centralized management.
