

Business Owner Details

**MODERN BRANCH SYSTEMS +  
AUTOMATION + STAFF TABLETS**

**EFFICIENT BRANCHES**

**01**

**CONNECT**

your Teller browser application to branch devices.

**02**

**SHARE**

branch devices between teller stations and tablet users (Universal Bankers).

**03**

**SEAMLESSLY  
INTEGRATE**

teller transactions to all branch devices for optimal security, efficiency, and accuracy.

**04**

**MONITOR  
AND CONTROL**

your branch devices centrally, with real-time cash positions available from cash machines.

**05**

**ENABLE  
UNIVERSAL BANKERS**

provide tablets and tools to work seamlessly through the branch.

**06**

**SAVE TIME  
AND MONEY**

on your browser application development.

**EFFICIENT TELLER TRANSACTIONS  
NEED SEAMLESS INTERFACING  
TO BRANCH DEVICES**

With many enterprise applications now being delivered using a browser for efficiency, control, and security, branch systems have followed suit.

This migration to browser-based applications means that browsers now need to interface with devices that are not part of a typical browser's device integration library.

Connect your teller (or other application) software to the branch peripherals and create seamless branch automation and faster, more accurate branch transactions.

inBranch Devices software is installed on the teller station, ATM, or ITM and acts as a bridge between your browser application and the devices connected to the machine.

**MINIMIZE PROJECT  
AND TECHNICAL RISK,  
SHORTEN DEVELOPMENT  
TIME AND SAVE MONEY  
BY USING ANTUAR  
INBRANCH DEVICES.**
