

Make your own BLUE campaign heart

Want to bring wildlife into your garden? Make your own heart sign and start rewilding at home! By placing one of our blue hearts in your garden and letting just a bit of land go wild you are helping us encourage the return of the UK's beloved fauna and flora. Don't forget to take a picture of what turns up to your garden.

Follow these steps to make your own heart sign:

1. Find your local wood recycling warehouse by following this link: <http://www.communitywoodrecycling.org.uk/recycle-wood/>. Or get creative! Any recycled material will do, as long as it can survive our lovely English weather.
2. Cut out the heart template and transfer it onto your chosen material.
3. Don't forget to make it blue!
4. Get a wooden stake and either superglue or nail the BLUE campaign heart to it.
5. Stick it in your chosen mini-rewilding site, and make sure it's secure. You can do this using a thicker piece of wood and securing them together with a zip tie.
