Healthcare Systems

secureone® INDIVIDUAL HEALTH PLAN

At the pharmacy, members will simply present their membership card to receive an average savings from 15% to 60% off the retail price of generic drugs and average savings from 15% to 25% off the retail price of brand name prescriptions. The pharmacist will enter their information from the identification card and receive significant savings at the time of purchase. Even if members have prescription benefits through a health insurance carrier, a comparison of costs between the two programs should be performed to determine the most savings.
