3D Accurate Laser Scanning At the Right Price

3D LASER SCANNING USES

- Retrofits – Revision of P&ID's Piping and Instrumentation Diagrams of existing facilities
- Construction Monitoring: verification, inspection and analysis
- Asset & Facility Management
- As-Built Verification & Existing Conditions
- Virtual Simulation: Virtual Walkdown & Virtual Fit-Up
- Interference & Clash Detection Analysis
- Scan to BIM Building information Modeling

3D LASER SCANNING APPLICATIONS

- Complex environments with piping, ducting and assemblies
- Hazardous and difficult to reach spaces
- Large objects that prove difficult to measure traditionally
- Complex geometries with nonconformity

COMPETITIVE ADVANTAGES

- Fast Service in any location in the United States or Panama
- Millimetric accuracy
- Lean operation that is reflected in cost efficiencies
- Customized services according to the desired output use
- Great vendor relationships and alliances worldwide
