AISA PerthSEC Conference 2024 Call for Speakers

AISA is pleased to invite current members and the wider cyber security community to submit a proposal for AISA's PerthSEC Conference, to be held at Crown Perth on Wednesday 23 October 2024. The PerthSEC Conference is the single largest member event in Western Australia for professionals in the information security and cyber security industries. PerthSEC is hosted by the Western Australian AISA Branch Committee and AISA National Operations Event Team for members and broader community.

We now call upon the community to share your experience and knowledge at this year's conference by submitting your presentation proposal.

No matter whether you are an independent consultant, a security professional at a small company, a blogger, an expert security architect at a large company with a story to tell, a security manager or privacy expert – your submissions will all be reviewed equally. All submissions will be reviewed by the PerthSEC Program Committee and will have to adhere to important selection criteria – the presentation must be vendor neutral and cannot be product focused.

Whilst we are not limiting the topics that you can submit a paper on, we will rate favourably those presentations which are focused on the following areas:

- Cyber crime, intelligence and policing
- Cyber security, Ransomware, incidents and technology
- Governance, risk and strategy
- Artificial Intelligence, machine learning and Generative AI
