RUTGER'S CONCRETE CANOE CONSTRUCTION USING CARBON AND GLASS REINFORCED GRIDS

PRESENTED BY THE RUTGERS CANOE TEAM

Daniel Grek James McCarten Robert Kudenchak Johanna Doukakis

ABSTRACT: The 2010 Rutgers ASCE Concrete Canoe team continues a challenge of constructing and presenting a fully functional canoe primarily made of concrete. The team utilizes both commercially produced and handmade composite meshes as flexural support and structural framework for casting. Team captains Daniel Grek and James McCarten, PR Manager Robert Kudenchak and Structural Specialist Johanna Doukakis are the core of the team and will jointly make the presentation, detailing some of the design and construction aspects of the project. The canoe should be fully cured and floatable by the time of this presentation.

NEW NJ SAMPE WEBSITE

Visit <u>www.NJSAMPE.org</u>

We now have a website. It still needs lots of improvement, but it's a start. We need lots of input and recommendations from you to make it useful. All of our sponsors have links to their sites. If you are a sponsor, please make sure it's linked to the right site. If you are a consultant and want your resume on line, we have a place for that too. Also on the website you will find a history of our chapter and even our Bylaws. There's also a history of the Bridge Building contest, going all the way back to when it was only a NJ high school contest.

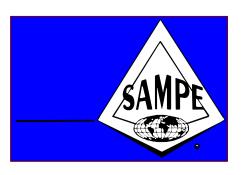

So visit the website and get back to us with your recommendations and ideas and critiques. Please send them to hskliger@comcast.net.

NEW MEMBERS

The New Jersey Chapter would like to welcome the following new chapter members:

SAMPE 2010 – ISS&E – Seattle, WA. May 17 – 20, 2010

2010... a new decade. A fresh start. SAMPE 2010 takes your education and networking experiences to a new level. Capitalize on the possibilities.

Learn Our exceptional technical program is unrivaled in the field of materials and processes. Prominent speakers, innovators, and leaders bring their experience and expertise to every one of our conference programs. Don't miss this great opportunity.

Sessions Fifty-eight sessions are being offered at SAMPE 2010. Sessions are a collection of technical presentations based on a paper published in our conference proceedings.

Tutorials We're offering eight tutorials, half-day training courses, on a variety of subjects designed for all levels of composites professionals. • Damage Tolerance and Assessment • NanoTechnology ❖ ◆ Overview and Assessment Nano Technology • Out-of-Autoclave Processing • Dimensional Control and Process Modeling Dimensional Control and Process Modeling Control and Process Modeling • Test Methods for Composites • Composite Repair Technology Test Methods for Composites Composite Repair Technology • Manufacturing Technology • Composite Tooling Composite

Panels Our panels consist of industry leaders and influencers who present and debate on the issues, technology, goals and objectives impacting today's M&P professionals, companies, and educators. • Commercialization of Nanotechnology • Out-of-Autoclave Composite Processing-Challenges and Opportunities Composite Processing - Challenges and Opportunities • Frontiers in Materials and Process Technology in Materials and Process • Advanced Composite Structural Repair Systems for the Future Composite Structural Systems for the Future • Tooling for Composites • New Materials and Recent Trends Tooling for Composites Materials and Recent Trends • Benchmarking of Composites Benchmarking of Composites

Please visit the SAMPE Web Site http://SAMPE2010.sampe.org for detailed information concerning registration, hotels and the preliminary program.
