DIAMOND PLATED

EXTREME GRIP

MADE IN THE U.S.A.

The Patoma Pick

The Strongest Grip

Our patented guitar pick has a diamond non-slip grip that almost makes it feel like the pick is sticking to your fingers. It won't twist or fall from your fingers, even if they are sweaty. The Patoma Pick has a world class grip that will allow you to play with more confidence.

Made in the U.S.A

We handmade our patented Patoma Picks at our workshop in New Jersey, ensuring each guitar pick is up to our high standards. Each pick takes over 8 hours to make in a lengthy, intricate process that includes electro-plating, and lasering each pick. We make sure each pick passes our quality checks at each step in the process to guarantee you get a perfect Patoma Pick.

The Patented Grip

Patoma Picks have patented non-slip diamond grips that will never leave your hand. The Diamond Grip provides optimal control and precision during every performance. Unlike other grip picks, our patented diamond grip is not glued to the pick; It is electro-plated to the pick which makes it much stronger and durable.
