What's The Challenge?

Owning and running an established small business comes with unique challenges: maintaining momentum, navigating market changes, and continuously engaging a team that's already seen the company through its early growth.

Research shows that over **50%** of small businesses in the UK struggle to scale sustainably, often facing difficulties in adapting to new challenges related to strategic direction, employee alignment, and team motivation (Federation of Small Businesses, 2022).

Additionally, experienced employees are costly to replace, with turnover costing up to **200%** of an employee's salary in terms of lost productivity, recruitment, and onboarding expenses (Society for Human Resource Management, 2020).

Without ongoing development and alignment, the risk of stagnation and increased turnover rises, limiting your business's ability to innovate and remain competitive.

So here is why its worth solving.

Retaining experienced team members and fostering a culture of continuous engagement is essential for long-term growth and resilience.

Studies reveal that companies with high employee engagement outperform competitors by **147%** in earnings per share and see up to **41%** lower absenteeism (Gallup, 2022).

For established businesses, maintaining a culture where employees are engaged and aligned with the company's evolving goals fosters loyalty and attracts top talent.

A motivated and well-led team enables your business to meet challenges head-on, seize new market opportunities, and sustain a culture that empowers growth, innovation, and operational excellence.
