

The diagram illustrates a 12'4" wide experimental space. Key features and dimensions include:

- Overall Dimensions:** Total width is 12'4". The hanging width is 9'4".
- Obstacles:** There are four rectangular obstacles arranged in a 2x2 grid. The top row obstacles are 16" wide, and the bottom row obstacles are 24" wide. The distance between the top and bottom obstacles is 8".
- Dimensions and Distances:**
 - The distance from the left wall corner to the first obstacle is 4' - 6".
 - The distance from the first obstacle to the center line (C/L) is 7' - 8" (Wall to C/L).
 - The distance from the C/L to the right wall corner is 7' - 6".
 - The distance from the right wall corner to the light source is 3'.
 - The distance from the light source to the right wall corner is 3'.
 - The distance from the light source to the right wall corner is 3'.
 - The distance from the light source to the right wall corner is 3'.
- Other Labels:** "Baseline" is indicated on the left side. "Floor" is labeled at the bottom corners. "Wall Corner" is labeled on the right side.
