We are no longer well-adjusted students of the Bible as we wander out of Sunday School coloring books, away from the standard thoughts and doctrines of men

Be Bereans

- Acts 17:10 Then the brethren immediately sent Paul and Silas away by night to Berea. When they arrived, they went into the synagogue of the Jews.
- Acts 17:11 These were more fair-minded than those in Thessalonica, in that they received the word with all readiness, and searched the Scriptures daily to find out whether these things were so.

Zep 2:7

The coast shall be for the remnant of the house of Judah;
They shall feed their flocks there;
In the houses of Ashkelon they shall lie down at evening.
For the LORD their God will intervene for them,
And return their captives.

The Central Theme

- The OT is an account of a Nation.
- The NT is the account of a Man.
- The Creator became that Man. His appearance is the Central Event of all history.
- He died to purchase us and is alive now.
- The most exalted privilege is to know Him. That's what the Bible is all about.

Is it Real?

REALITY

The Ultimate Issue – Is it REAL?

- We are in possession of a message of extraterrestrial origin.
- It portrays us as objects of an unseen warfare.
- Our eternal destiny depends upon our relationship with the ultimate victor in this cosmic conflict.
- Where do *you* stand with respect to *Him*?

Some Preliminaries

- Shedding the baggage of our misconceptions
- 20th century science (not fake science) has vindicated the Biblical perspectives of reality
 - The Finite Universe
 - The Discovery of the nature of Time
 - The realization of Hyperspaces

Boundaries of Reality

- Two Mathematical Conceptions that go beyond our physical reality:
 - **Infinity**
 - Finite Universe: Cosmos *not* infinite
 - Finite Universe: Quantum Physics
 - Length, Mass, Time = *Quantized* (digital)
 - **Randomness**
 - Chaos Theory
 - Mandelbrot Diagrams

A Few Caveats

- The Word of God is *Inexhaustible*.
 - 24 years would be insufficient...
- The truth is in the details.
 - Every detail is connected to every other.
- Our Goal: A Strategic Grasp of the Total
 - A conceptual grounding in the major truths
 - A navigational awareness to fit it all together
 - Trust

Two Critical Discoveries

- 1) We have in our possession
an *Integrated* Message System
 - 66 separate books
 - Penned by 40 different individuals
 - Over thousands of years
- 2) Which provably has its origin from
outside our time domain.

- Elohim is an address where spiritual beings exist... Sometimes called Elohim or sons of God, *'B'nai Elohim'*
- The point is that in Genesis 1: 1, if we translate Aleph Tav properly, It should read...
“In the Beginning, Elohiym, the first and the last, created the heavens and the earth.”

There is only one, singular, Elohim who is the First and the Last.

Rev 1: 4 ...Him which is, and who was, and is to come (G3801)

G3801 also occurs in
Rev 1: 8, 4: 8, and 11: 17

*Exodus 3: 14 God said to Moses,
"I AM WHO I AM." And He said,
"Thus you shall say to the children
of Israel, 'I AM has sent me to you.' "*

G3801 in Strongs – Had to create new number for this term because it is a **grammatical error**

- G3801 – Eternal past, present, future
- Contains G1501, G2064, G2532 twice
 - G1510 – first person present
 - G2065 – To come or go
 - G2532 – cumulative force
 - G3588 – Masc, fem, neuter combo

In the Greek Septuagint;

- Contains G1501, G2532, and rolls up G3588
 - G1510 – First person present
 - G2532 – Cumulative force
 - G3588 – Masc, fem and neuter combo

How's that for a 'Grammatical Error' to emphasize the point from OT to Rev?

Revelation is in code: every code is explained in Scripture... Virtually every other book of the Bible is required!

The 2021 Dead Sea Scroll Discoveries

Dating

These documents have been tentatively dated to the 1st century BCE

These new fragments are most likely part of a previously discovered scroll, known as 8HevXIIgr, which is a minor prophet scroll from cave 8 of Nahal Hever.

The "Cave of Horrors" was originally excavated in 1953-1955. The cave got its name from numerous human skeletons of women, children, and infants (as well as coins, pottery, letters, and biblical scrolls) that were found in the original archaeological investigation. The bodies came from the second Jewish uprising against Rome, known as the Bar Kokhba revolt (132-135 CE). The cave however, contained artifacts thousands of years older than the Bar Kokhba period. Along with the recent discovery, a mummified child from 4000 BCE and an intact woven basket from 8 500 BCE was also found.

In March of 2021 the Israel Antiquities Authority (IAA) announced the discovery of new biblical fragments of the Dead Sea Scrolls.

1st Dead Sea Scrolls discovered in 50 years

Contents

Zechariah 8:16-17

Nahum 1:5-6

The fragments of the newly discovered passages contains a revised edition of the Greek translation of the Hebrew Bible known as the *kaige* or *proto-Theodotian* recension, and not the Septuagint. The text is not a rendering of the Greek translation of the Old Testament as much as a revision of the Greek translation of the minor prophets towards the standard Hebrew text-type. This text style exemplifies a somewhat literalistic translation philosophy that tries to agree more closely not just with the sense of the Hebrew, but its wording more specifically.

The discovery was made in a cave hundreds of meters high known as the "Cave of Horrors," in the southern end of the dry river bed called Nahal Hever.

Nahal Hever
Bar Kokhba's Caves

οὗτοι οἱ λόγοι οὓς ποιήσατε λαλεῖτε ἀλήθειαν ἕκαστος πρὸς τὸν πλησίον αὐτοῦ καὶ κρίμα εἰρηνικὸν κρίνατε ἐν ταῖς πύλαις ὑμῶν καὶ ἕκαστος τὴν κακίαν τοῦ πλησίον αὐτοῦ μὴ λογίζεσθε ἐν ταῖς καρδίαις ὑμῶν καὶ ὄρκον ψευδῆ μὴ ἀγαπάτε διότι ταῦτα πάντα ἐμίσησα λέγει παντοκράτωρ

The words of the new fragments are in Greek, except for the single divine name of YHWH, conventionally referred to as the Tetragrammaton, which is written in Paleo-Hebrew script.

The manuscript fragments discovered are tiny. The biggest ones are not much bigger than the size of a thumbnail.

LXX

The Greek Old Testament, known as the *Septuagint* (often abbreviated in the Roman numerals *LXX*), is the earliest surviving Greek translation of books from the Hebrew Bible and a number of inter-testamental books of the biblical apocrypha. This collection is believed to have been translated somewhere between the 3rd and 2nd centuries BCE.

M

The *Masoretic Text* is the authoritative text of the Hebrew Tanakh (Old Testament). The *Masoretic Text* contains the later added vocalization and accentuation. It was primarily copied, edited, and disseminated by the Jewish Masoerete scribes between the 7th and 10th centuries CE.

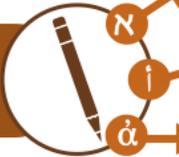

The Dead Sea Scrolls

Dating 

These documents were penned between 3rd century BCE — 1st century CE

Although most of the scrolls are parchment with some being papyrus, one is made of copper. Known as the "Copper Scroll," it lists 64 locations - 63 of which are said to be caches of silver and gold. None of these treasures have been found.

Over 970 scrolls assembled from more than 10 000 fragments make up the collection we call the Dead Sea Scrolls.

970+ scrolls

The longest is 29 feet long

The smallest is no bigger than 3 inches

We are not entirely sure who wrote, copied, and stored all of the Dead Sea Scrolls. It is thought that most of them are the product of the Jewish sect known as the Essenes. However, scholars also believe that a good number may be the work of the Sadducees or potentially other less well known Jewish groups living in the deserts around the Dead Sea.

24 feet long

The Isaiah scroll was 1 000 years older than any previously discovered copy of that book. It is one of the only scrolls that contains the entire book start to finish.

Henry Van Dyke:

“Born in the East and clothed in Oriental form
and imagery,
the Bible walks the ways of the world with familiar feet
and enters land after land to find its own everywhere.
It has learned to speak in hundreds of languages
to the heart of man.
Children listen to its stories with wonder and delight,
and wise men ponder them as parables of life.
The wicked and the proud tremble at its warnings,
but to the wounded and penitent
it has a mother’s voice.”

Misquote of Ben Franklin

~~“Jack of all trades, master of none”~~

“Jack of all trades, master of One.”

A cultured person is one who knows

Something about everything

Everything about something.

*A Christian's specialization must be
the Bible.*

Daniel Webster:

“If we abide by the principles taught in the Bible, our country will go on prospering and to prosper; but if we and our posterity neglect its instructions and authority, no man can tell how sudden a catastrophe may overwhelm us and bury all our glory in profound obscurity.”

Keeping Things in Perspective

- ***Psa 2:2** The kings of the earth set themselves, And the rulers take counsel together, Against the LORD and against His Anointed, saying,*
- ***Psa 2:3** “Let us break Their bonds in pieces And cast away Their cords from us.”*
- ***Psa 2:4** He who sits in the heavens shall laugh; The Lord shall hold them in derision.*
- ***Psa 2:5** Then He shall speak to them in His wrath, And distress them in His deep displeasure:*
- ***Psa 2:6** “Yet I have set My King On My holy hill of Zion.”*
- ***Psa 2:7** “I will declare the decree: The LORD has said to Me, ‘You are My Son, Today I have begotten You.*
- ***Psa 2:8** Ask of Me, and I will give You The nations for Your inheritance, And the ends of the earth for Your possession.*
- ***Psa 2:9** You shall break them with a rod of iron; You shall dash them to pieces like a potter’s vessel.’”*
- ***Psa 2:10** Now therefore, be wise, O kings; Be instructed, you judges of the earth.*
- ***Psa 2:11** Serve the LORD with fear, And rejoice with trembling.*
- ***Psa 2:12** Kiss the Son, lest He be angry, And you perish in the way, When His wrath is kindled but a little. Blessed are all those who put their trust in Him.*

There was a tendency in religious scribal practice, particularly although not exclusively Christian texts, to write *nomina sacra* (Latin for "sacred names"). This scribal pattern abbreviated several frequently occurring words, names, and titles within Greek manuscripts; among the most common were religious words such as God (ΘΣ/ΘΥ), Lord (ΚΣ/ΚΥ), Jesus (ΙΣ/ΙΥ), and Christ (ΧΣ/ΧΥ). However, there are occasions where words such as human being/man (ΑΝΟΣ/ΑΝΟΥ), Jerusalem (ΙΛΗΜ), cross (ΣΤΣ/ΣΤΥ) and blood (ΑΜΑ) were abbreviated as a *nomina sacra*. Typically *nomina sacra* used the first two (or three depending on the length of the word) letters of the word to create a sort of contraction. The reason for these abbreviations, whether for space, religious reverence, piety, or otherwise, is highly debated. P46 includes multiple examples of the most common *nomina sacra* used throughout Christian manuscripts.

P46 has stichoi notations at the end of a number of books. Stichoi were used by professional scribes to note how many lines had been copied for commensurate pay. This points to P46 being professionally produced.

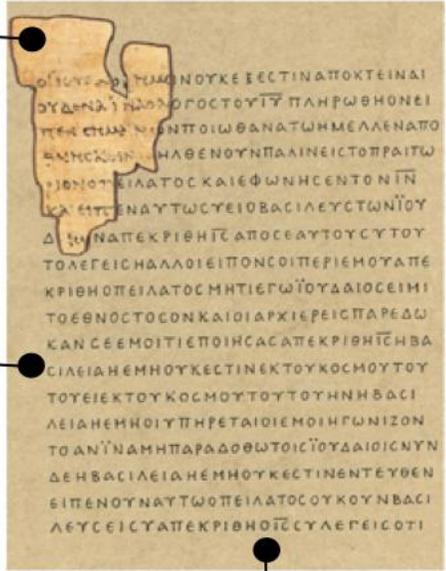

Date   

2nd-3rd Century

There is much debate about the approximate date of P52. Although it has been dated as early as 100 CE and as late as 300 CE the consensus is that it sits somewhere within the 2nd century.

The recto side preserve the top left corner of a right-hand page; the verso preserves the top right corner of a left-hand page.

Text is rounded and elaborate. The style indicates the book hand of a non-professional scribe. Nonetheless, the seeming effort in how the text appears to have been written indicates an individual who was educated and writes in a careful imitation calligraphic hand.

If the codex from which P52 originates contained the entire text of the Gospel of John, it would have constituted a single quire book of around 130 pages (33 large folded papyrus sheets written on both sides); measuring approximately 21 by 16 cm when closed. This could have been as many as 576 pages in total.

*Egypt, and maybe even Oxyrhynchus, Egypt, is the speculated original location but it could have realistically been produced anywhere in the Mediterranean at that time.

P66 was originally dated to the 2nd century but in recent decades, due to the palaeographical and papyrological analysis, hypothesized dates as early the early 2nd and as late as the mid 4th centuries have been tabled. The consensus amid this disparity however, remains late 2nd or early 3d century.

P⁶⁶
The Bodmer Papyri

P66 is our earliest near complete copy of the Gospel of John. About 2/3 of the original document remains.

There are three hands present in the production of the manuscript. This has led some to believe there were three scribes involved, others that the original scribe is the one who made the subsequent corrections.

The *stauogram* symbol was used by early New Testament scribes when writing about Christ's death, often substituting *stauograms* in place of the words "cross" and "crucifixion." This was done by taking the Greek letter *tau* (τ), and the letter (ρ), combining them to create the final pictogram. In the above picture you can see a number of *stauograms* taken from the text of John 19:15-20 of P66. There are 10 *stauograms* within P66.

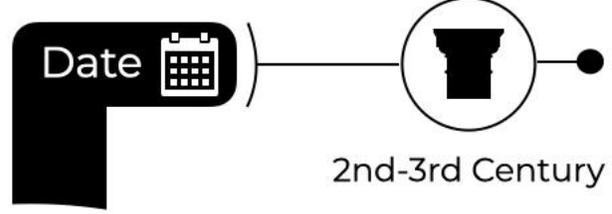

Several of the verses in Ch.13 were marked heavily with breathing marks, indicating a lectionary purpose.

Contains 75 identifiable papyrus folios and numerous fragments.

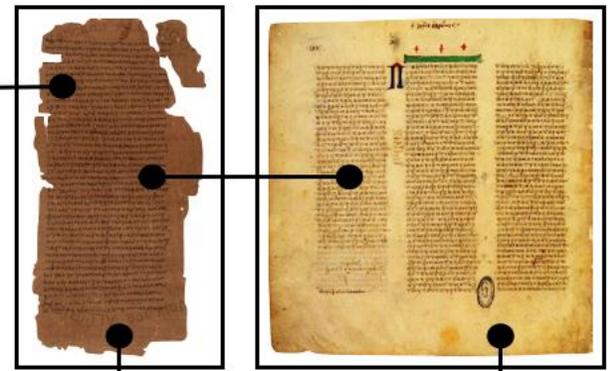

The large majuscule single-column text may indicate that it was meant to be read in public.

*Egypt is the speculated original location but it could have realistically been produced anywhere in the Mediterranean at that time.

Some have dated P75 to the 4th century but the rationale for this dating is less to do with the palaeographical evidence and more to do with its relationship with **B**.

P75 conspicuously lacks the text of Christ's agony in Gethsemane (Luke 22:43-44) and the Pericope Adulterae (John 7:53-8:11).

Average line length is 29-32 lines per page.

P⁷⁵
Papyrus Bodmer XIV-XV

There is a surprising connection between the text of P75 and the 4th century Codex Vaticanus (aka **B**), sharing 85% agreement with one another. Although it is unlikely that the scribes who produced **B** used P75 as an exemplar (and if P75 is indeed an earlier text) it was the sort used in formulating the later 4th century codex.

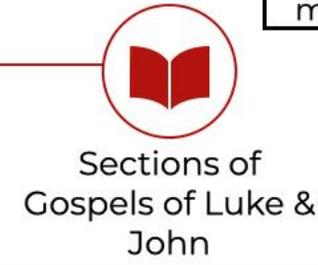

The discovery of P75 (and its close connection with **B**) changed the consensus view regarding the fluidity and flexibility of the text of the New Testament within the first 3 centuries. It also caused scholars to reevaluate how they viewed **B**. Previous to P75 many viewed **B** as somewhat of a scholarly resection, resulting from editorial selection across the various textual histories. If one takes an earlier date, then P75 as an early example sheds light on **B** as a potential codex copy (with some modifications) of a manuscript much like P75, and not a 4th century recension.

Text is neat tight vertical majuscule script that is angular and resembles other examples of professional scribal hands in the 2nd and 3rd centuries. This is sometimes referred to as "severe style" or "Formal Mixed" in the scholarly literature.

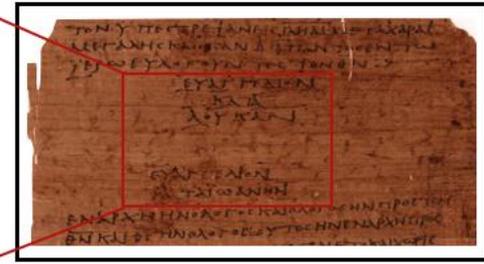

P75 is unusual as a manuscript from this era due to its inclusion of the ending of Luke and the beginning of John on the same page. Usually a new page would be used to start a new book.

THE BIBLICAL CODEX & SCROLL (papyrus)

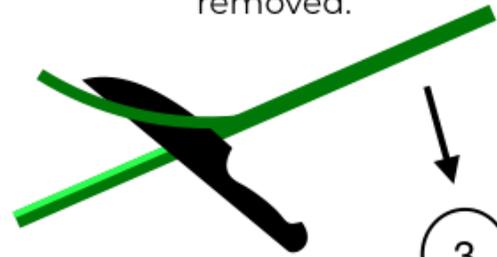

A CODEX (CODICES IN THE PLURAL) IS THE HISTORICAL PREDECESSOR OF THE MODERN PUBLISHED BOOK. THROUGHOUT ANTIQUITY THE CODEX WAS THE ALTERNATIVE TO THE SCROLL, WHICH WAS THE DOMINANT MEDIUM OF WRITTEN DOCUMENTATION IN THE ANCIENT WORLD.

Papyrus was the writing material used by the ancient Egyptians, Greeks, and Romans the was made from the piths of the stem of the water reed.

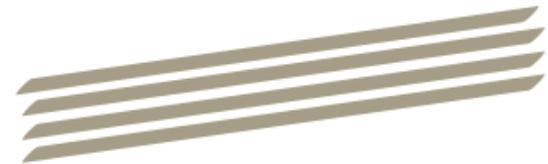

1 About 30cm (12") of the stem of the papyrus plant is cut to make approximately a 61cm (24" long page.

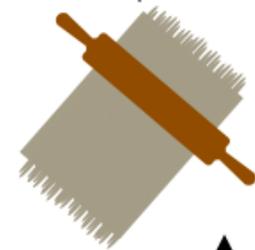

2 A knife is then used to slide down the length of the plant until the entire outer layer is removed.

3 The outer portion (pith) of the stalk is cut into thin strips, soaked, and a stone is placed on top where they are then dried on a flat surface.

4 The second layer of strips is placed in the same way on top of the first but oriented at a right angle to the first layer of strips. These two layers are pressed together and dried.

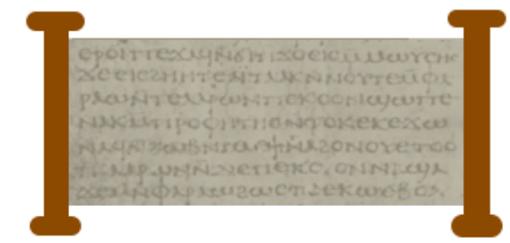

Sometimes it was covered with a cloth and beaten with a mallet

P46 cross hatching and papyrus striations

5 The two sides of the resulting surface, a *kollema*, have papyrus fibres running at a perpendicular angle. Several *kollemata* (the plural of *kollema*) constructed in this way, usually 20-25cm wide (9-10") would be pasted together to form long rolls.

6 Before the 3rd century, and the increased popularity of the codex, works of literature would usually just be copied on

to one more rolls. The roll was therefore a simple production relative to the more complicated codex. The standard roll was inscribed on the horizontal fibres because it is easier to write along the horizontal fibres rather than against the vertical fibres and because the written surface, being on the inside of the roll, was protected.

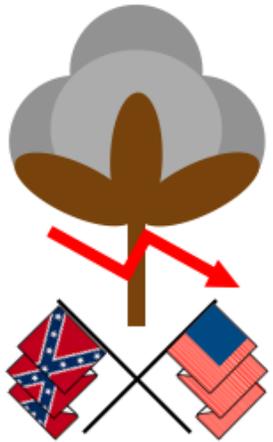

Rolls that are inscribed on both sides (i.e. a work which would continue to be copied on the back side, that is, the vertical fibres) is called an *opisthograph*.

When codices came to be produced, the sheets were usually cut from blank rolls, as we can see from the recent presence of *kollesis* on leaves of codices. It seems that only in exceptional cases were papyrus sheets not cut from a roll but made solely for codex use.

Along with Codex Vaticanus, \aleph is considered one of the most valuable Greek manuscripts of the Bible in existence.

\aleph is made up of over 400 large leaves of parchment. It could have taken as many as 360 sheep to produce.

CODEX SINAITICUS

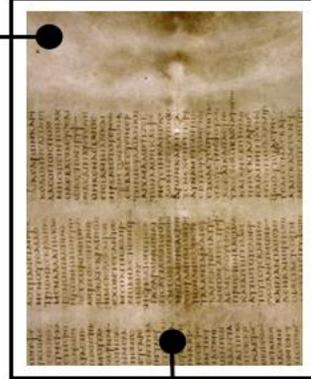

(\aleph)

Origin

Caesarea?

Quality parchment relies on the selection of good skins unblemished by flaws. The colour of the wool also reflects the final surface of the parchment. White sheep or calves and goats will tend to produce white parchment, whereas animals with darker coats will produce parchment showing shadowy or brown patterns.

Detail here reveals a skeletal parchment feature on Quire 41, folio 4 recto. The image is rotated 90 degrees to the right.

\aleph carries on patterns of textual features of earlier Christian manuscripts. *Nomina Sacra*, ekthesis, titles, paragraphoi, etc. are all present in \aleph and manuscripts from centuries earlier.

Even though the text of \aleph is Alexandrian, the first 8 chapters of John's Gospel in it are Western in their text type*.

Material

Parchment

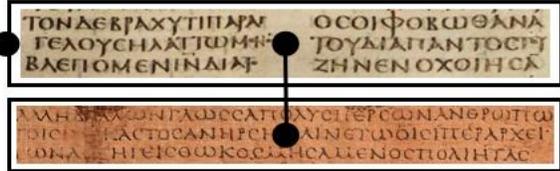

\aleph exemplifies a unique column format and a clear script like that of high quality book rolls of the Roman Imperial peak. Below you can see a section of the text of Hebrews from \aleph on the top and Hawara Homer (2nd century) on the bottom.

Contents

Half of the OT LXX + Deuterocanonical Books, all of the NT + The Shepherd of Hermes & Epistle of Barnabas

Large sections of the beginning books of the OT are missing. However, it is very confidently assumed that the codex originally contained them.

There appears to be at least 2 (debatably 3) scribes and as many as 7 possible correctors involved in the state of \aleph , as we have it today. Text is Alexandrian and written in *scripta continua* majuscule.

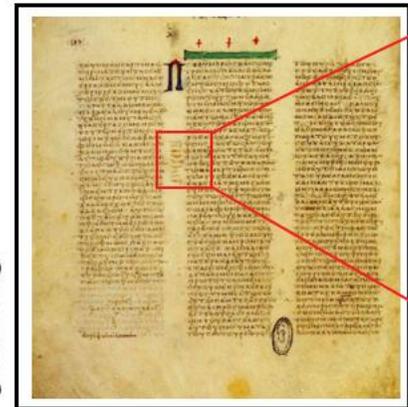

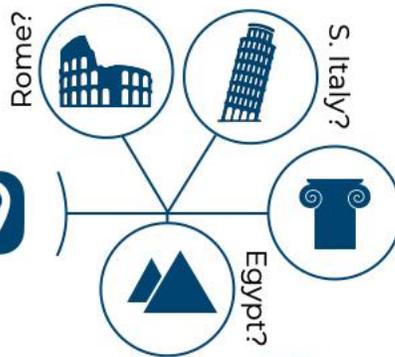

Parts of \aleph are scattered across four libraries in the world, however, the majority of the extant manuscript is held in the British Library in London, where it is on public display.

*The concept of text-types has been almost completely done away with in modern textual criticism. "Alexandrian" and "Western," as descriptions of textual traditions may prove useful in some circumstances but the concept is somewhat anachronistic.

Date  
4th Century

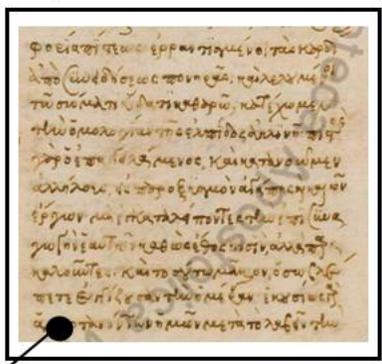

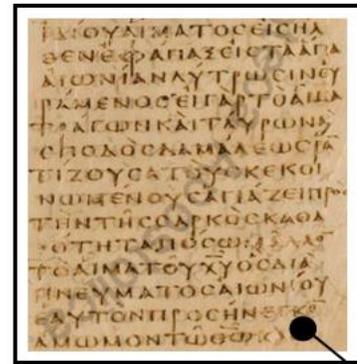

The name *Codex Vaticanus* comes from the Vatican Library where it has been conserved since the 15th century.

The text is written in ornamental majuscule *scripta continua*. The letters are small and neat and in equal distance to one another.

B's text at Hebrews 1:3 has a reading that has been erased and corrected by a re-inker in the medieval period. A third scribe's hand erased the correction, rewrote the original text, and wrote a marginal note that reads: "Fool and idiot, leave the old reading and stop changing things!"

The text of Hebrews in **B**, abruptly stops midway through 9:14 at the end of the page, the text of Revelation is present, but it is written in a hand that appears to be from the 1400s, and thus represents a different manuscript form than the ancient portion. This supplement text is also listed separately from **B**, known as GA 1957.

The script between folio 1518 and 1519 (**B's** text of Hebrews) is drastically different. 1518 is a clear 4th century *scripta continua* majuscule script whereas 1519 is in a minuscule calligraphic hand which probably comes from the 10th or 11th century.

Contents 

There appear to be at least 3 scribes, 2 of whom appear to have written the Old Testament portion and 1 writing the entirety of the New Testament. 2 corrector hands in subsequent centuries are also present.

Nearly complete OT (LXX) + a number of Deuterocanonical books, the 4 Gospels, Acts, General Epistles, Pauline Epistles, Hebrews (up to 9:14), and Revelation.

B could have been as many as 830 parchment leaves originally. It is believed that approximately 71 leaves have been lost from the original folio. **B's** text of the Old Testament contains 617 sheets and the New Testament 142 sheets.

The codex contains 3 columns per page with 40-44 lines per page and 16-18 letters per line. Some sections of the Old Testament break the pattern with 2 columns instead of 3.
