THE GLAM ROBOT

A GLAMBOT EXPERIENCE

INSPIRED FROM THE GLAMBOT

The Glambot, popularized by Canadian director Cole Walisser, provides a red carpet experience at some of the biggest events like the Oscars and the Grammys since 2016.

WHAT IS IT.

The Glambot employs an industrial robot that has been customized to capture stunning cinematic footage. Paired with a high-speed camera, it can produce slow-motion output that is nothing short of breathtaking. Keep in mind that this top-of-the-line equipment can cost up to 400k, with a daily rental price ranging from 50-100k.

Our Robot rental price can be 10-15 time less

A COBOT ?

A cobot, short for collaborative robot, is designed to interact directly with humans in a shared space or close proximity environment.

By employing a cobot, we can offer an excellent customer experience with fewer logistics and a reduced need for staff.

Revolutionizing the Glambot Experience with Glam360MTL and our Cobot

Have you ever seen the behind-the-scenes videos of the Glambot? It requires a lot of space to pull off such an amazing experience.

However, with Glam360MTL and our cobot, you can enjoy the same experience in a much smaller space. Our cobot is programmed to make specific movements that complement your event's decor, all in a 10 by 15 feet space, much smaller than the original Glambot.

THE VIDEO

We understand that your needs and event objectives may vary, which is why we offer different capture devices. To achieve a dramatic output, we combine fast movements of the cobot with the power of slow motion.

For higher quality video, we use a cinematic camera such as the Zcam E2-M4. Alternatively, we recommend the GoPro for fast-paced events. Both devices are capable of capturing 240 FPS video in full HD (1080p).

INSTANTS SHARING/CUSTOMIZED VIDEO

Enhance Your Brand Exposure and Boost Event Visibility with Our Technology

Our innovative technology now allows for the inclusion of audio, text, and logos from your organization or event sponsors in the final video output.

With on-site video distribution, guests can easily share their experience on social media, expanding your brand's reach and increasing event visibility.
