

## The Pet Convincer User's Guide

Congratulations! You have purchased the most comprehensive, pain free, humane and safe pet training device ever created!

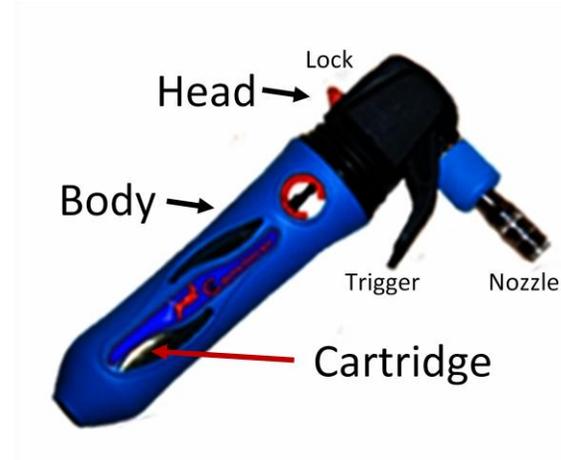

With proper use, your pet (dog/cat) will quickly learn what behaviors are off limits.

As with any tool, the Pet Convincer is most effective when used correctly. Please take a moment to read through this user's guide so that you and your pet can get on the road to enjoyable companionship!

### The Device.

There are three (3) major components to the Pet Convincer:

1. Head – trigger, nozzle, lock
2. Body (acts as a Hand Grip)
3. Cartridge (CO<sub>2</sub>; inside the Body)

### Getting Started:

**IMPORTANT:** You should get acquainted with the Pet Convincer **BEFORE** you attempt to use it. Make sure that these procedures are accomplished away from your pet and children. **Do not let children use the Pet Convincer. It is not a toy!**

### Loading the Device:

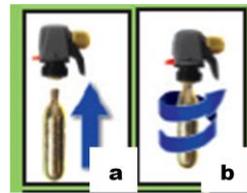

**Threaded CO<sub>2</sub> Cartridge:** Grasp the Body with one hand and the Head with the other. Turn the Head counter-clockwise and separate the two parts.

a) Without depressing the trigger lever, screw the Cartridge slowly into the treads in the Head until the Cartridge begins to contact the puncture pin.

b) Quickly continue screwing in the Cartridge until hand tight (cannot be turned/screwed in anymore by hand, without excessively overtightening. Also see NOTE below.) This

punctures (activates) and seals the CO<sub>2</sub> Cartridge to the Head.

Reattach the Body to the Head.

(See images a & b)

**NOTE:** You may hear a little “puff” as the Cartridge is screwed on. No unwanted, escaping CO<sub>2</sub> leakage/hissing air occurs if the Cartridge seals correctly to the Head. Only when the Cartridge is empty, unscrew the empty Cartridge and please recycle the steel cylinder as locally appropriate.

c) **Safety Lock Feature:** Using your thumb, move the red safety lever lock to the “up” position to lock the trigger lever. Moving the red safety lever lock to the “down” position unlocks the front CO<sub>2</sub> trigger lever and **ONLY** then allows CO<sub>2</sub> to be dispensed by the Pet Convincer.

(See image c)

## **Safety First:**

The Pet Convincer is very safe and effective, when used correctly by an adult.

### **You should always:**

Store your Pet Convincer at normal ambient room temperature.  
Visually inspect the device for damage before using after being dropped.

### **You should never:**

Use the Pet Convincer at a distance closer than 8 inches (minimum distance).  
Point the Pet Convincer towards the face, eyes, or rectum of any animal.  
Use the Pet Convincer for any purpose other than those specified in these user guide instructions.

## **Testing the Device:**

### **This should be done away from your pet.**

Point the device away from your face and pull the trigger in a quick, short burst.  
Once you are comfortable with the trigger mechanism, you may want to try the device on your hand at the minimum distance of 8 inches.  
Each Cartridge will emit 15-30 bursts, depending on how long you depress the trigger. Short (~ one second) air bursts (blasts) are recommended to control your pet's behavior with the Pet Convincer.

## **Why it Works:**

The Pet Convincer interrupts and discourages unwanted behavior.

This device is so effective that many times only a single application is needed to "cure" a problem behavior.

Using the device correctly is critical for success, so please read the following

instructions carefully before using the Pet Convincer with your pet.

## **Using the Device:**

Now that you are familiar with the function and feel of the Pet Convincer, you are ready to use it to interrupt and discourage unwanted behavior of your pet.

You may want to set up a scenario that you are certain will illicit unwanted behavior. For Example, if your pet/dog likes to steal food from the counter, place a dish of food on the counter and supervise your pet for signs of interest.

When you see your pet attempt to get the food, give your pet/dog a verbal warning such as growling the word "WRONG" or making a sound like "AARRHHH".

Immediately after giving the verbal warning, spray the Pet Convincer just under, at the pet's shoulder blade or next to your pet (never in their face/eyes/rectum) at a minimum safe distance of 8 inches or more.

Your pet/dog will startle and you should stay still and say nothing to your pet for a moment or two.

Then call your pet/dog away from the area and reassure him/her that leaving the scene was the right thing to do.

You should never yell at or verbally correct your pet/dog after activating the Pet Convincer. Once the pet has stopped the unwanted behavior, you should praise his/her compliance.

It is as important to praise the good behavior as it is to correct the unwanted behavior. You are teaching your pet how you would like him/her to behave, so be supportive and reward their good behavior.

**Enjoy using your Pet Convincer with your pet!**
