Saurabhi Media migration services

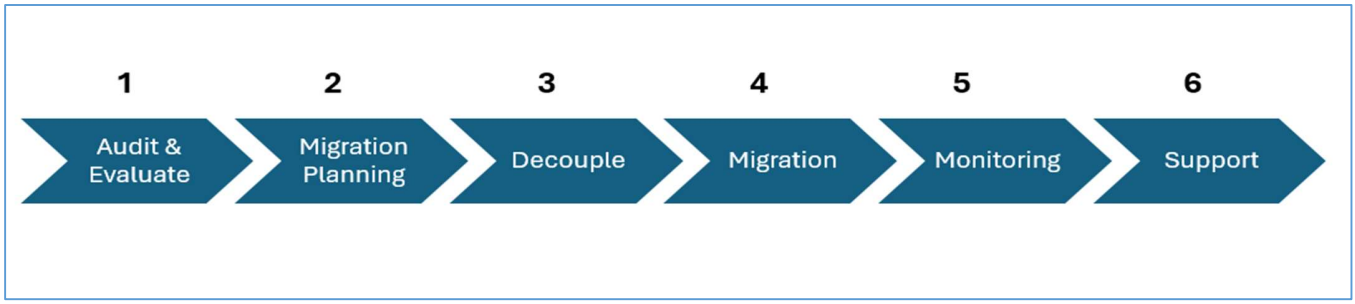

Saurabhi Media offers comprehensive migration services, specializing in the transformation of legacy digital archives to next-generation platforms. Our services include deep analysis, total cost of ownership (TCO) modelling, and managed migration, ensuring a seamless transition to cloud or hybrid environments. Our approach is turnkey, managing the entire migration process with zero operational impact, and focusing on eliminating vendor lock-in. Saurabhi Media's expertise is in handling large-scale migrations, providing 24/7 support, and helping clients modernize their digital archives efficiently

Steps for Migration

Saurabhi Media follows a comprehensive and structured process for Archive Migration Services, tailored to help organizations transition from legacy archive systems to next-generation platforms. Here's an overview of our approach:

1. **Audit and Evaluate**: Analyse and Assess the existing archive systems.
2. **Migration Planning**: Develop a migration strategy based on the audit.
3. **Archive Mediator Gateway**: Decouple user-facing applications from the archive system.
4. **Rapid Migrate Platform Execution**: Conduct the migration using the Archive Mediator Migrate Framework.
5. **Managed Migration**: Oversee the entire migration process.
6. **Post-Migration Support**: Ensure the new system is stable and fully integrated.

This end-to-end service is designed to be secure, cost-effective, and efficient, allowing organizations to transition to modern, scalable archive solutions with minimal disruption.
