READ TO ME PROGRAM WORKSHOP

2 AUGUST, 2023 | 10am - 12pm

1765 Madison Ave (@116 st), NYC 10029

Read to Me Goals:

1. **More Enjoyment:** Improving family relationships through literacy.
2. **Increased Awareness:** Parents becoming more aware of the importance of reading with children.
3. **Improved Relationships:** Parents and children enjoying stories together.

Sharing picture books with a child you love is a wonderful experience that they will always cherish. The Read to Me program was created to support family connections through reading. Combining technology and stories, we can strengthen family bonds, and improve literacy skills. The program will take place throughout the summer. By participating in this program a caregiver will learn easy to implement read aloud strategies, receive a picture book to build their at home library, and create a recorded video of themselves reading a selected reading book. A video link will be shared with that special child. The child will be able to have that beautiful video reading experience even when that adult cannot physically be there. There are so many wonderful benefits that come from sharing stories. Let's have some fun creating memorable family moments and future avid readers.
