

BULL SALE – FEBRUARY 8th, 2018

Hello and Holiday Greetings from all of us at

We would like to start by thanking all of you, our current and past customers!

This coming sale will be our **28th Annual Bull Sale** and we could not have made it this far without your support and use of our program.

On Thursday, February 8th ~ 2018, we will be offering 25 yearling bulls and 20 – 20 month **forage developed** bulls. These bulls have not been offered for sale before and we are excited to show you the direction we are taking in our future breeding stock offering.

****I want to make sure it's clear that we are not running a split herd. The 2018 sale will be the **last** yearling bulls we sell. From then on all bulls offered will be 20 month old virgin bulls. All born in May & June in our 42 day calving season.****

In the Fall of 2014 we instituted some big changes in our cattle program. I finally made up my mind to switch the entire herd to late spring calving, May & June. I look back now and wonder what has taken me so long. Other than changing the calving date, all the fundamental traits have stayed the same. **Fertility** is still #1 and all cows are exposed for only 42 days.

New Bull Videos and Online Bidding for Sale Day!

Foos Angus Principles

Maternal Ability – Cows must raise and wean a calf on mother's milk and grass or they are culled.

Efficient Growth – Efficient not only means pounds of calf weaned, but also inputs needed to produce that calf as well as the time to care for them.

Our goal at Foos Angus is always to think about how we can help our customers to be more profitable. If you see the results that you need from our program, we know that you'll return with confidence.

We believe that offering **forage developed bulls** is a key to profitability and the advantages are endless to you, our customer.

Mission Statement

Stock bred and raised for predictable results with compound rate of return

Again, **THANK YOU** for your continued support and we wish you a Happy New Year!
