

COVID STATEMENT

COVID – All your questions and concerns answered

We care about the wellbeing of our guests, our team, and the local communities that have welcomed us onto their properties. That's why we've been working day and night to ensure we can still deliver a proper trophy hunt experience, while providing a safe experience.

We've recently updated our safety procedures and processes, as guidelines from local health officials and the CDC have evolved. We'll continue to monitor and adapt as the situation continues to change.

Here's what we're doing in response to COVID-19 to ensure all of our Ranch [hunting] locations are safe for our guests and for our team:

- We've intensified our routine cleaning procedures; our team now spends 2x as long cleaning each cabin to ensure they're more deeply disinfected.
- Hunting is naturally socially distant - By design, you are out in the open breathing in fresh air.
- All of our guides & team members have been trained on detailed COVID19 cleaning practices based on the guidance of industry experts.
- At this time our guides are not required to wear masks but if requested by guest will do so. With that being said; all of our team have been provided personal protective equipment (PPE)—meaning gloves and masks to wear when appropriate according to state and local guidelines.
- Our guides & team continue practicing strict social distancing.
- Though supporting local businesses is incredibly important to us, we ask that you check local guidelines before visiting these places, including grocery stores and gas stations. We also ask that you respectfully wear a mask if and when visiting any local businesses if requested or stated.

Please know that our entire team is working hard to be as thoughtful, thorough, and responsible as possible in the midst of an ever-shifting landscape. We're here to answer any additional concerns or questions heavyhorned@heavyhornedoutfitters.com
