# Introducing
Forseti Analytics

Embedded Amazon QuickSight Analytics instantly pulls arrest and assessment data hosted on the AWS Government Cloud.
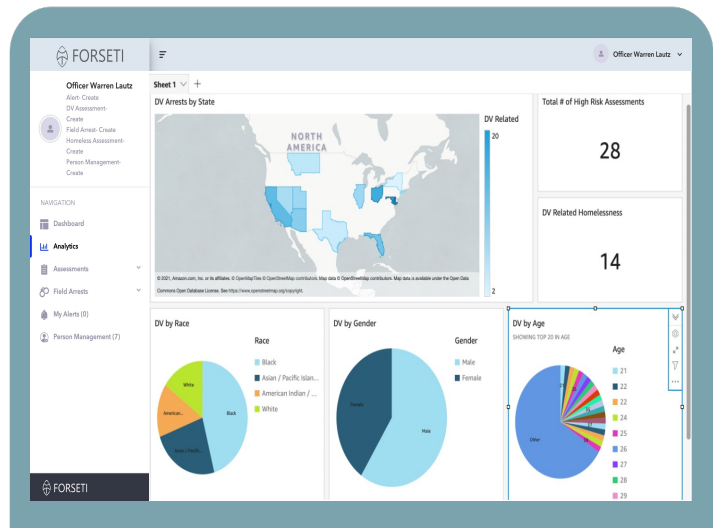

Real-time dashboards. Analytics are automatically updated as new data is input.

Quickly cycle between macro and micro views of your data.

Get a clear snapshot of your agency/department metrics. Easily print, export and/or share predefined reports.

Ensure data integrity by pre-determining data access to ensure data is not shared with those who should not receive it.

County Connect™
Unites the criminal and social justice stakeholders through data-sharing, multi-agency access and real-time alerts.

FORSETI Analytics

Introducing
Forseti Analytics

Enhance your department with Forseti's Referral & Alert System™. Automatically share relevant data with stakeholders that have a 'need-to-know.'

Discover a New Level of Productivity

Better efficiency when you're in the field. Peace of mind when you're not.

Ensure all information gathered is in accordance with department policy.

Accessible on all devices (iOS, Android and/or Windows). Mobile, Tablet and/or Mobile Digital Terminal (MDT).

All data gathered via Forseti software can be integrated into legacy systems and software.

Built in analytics, powered by Amazon QuickSight, allows for comprehensive report generation.

Integrated Audit Logs allows for transparency and accountability as well as officer and department peace of mind.

All data collected is stored on the Amazon Government Cloud. AWS Gov Cloud is FBI certified and CJIS compliant.
