

One form. Every detail. Nothing missed.

HART™ DV Supplemental is a fully integrated, workflow-driven domestic violence incident report — built directly into HART. Capture everything from lethality risk assessment to body abuse documentation to witness affidavits, all in a single smart form.

Integrated Risk Assessment — any lethality or custom risk assessment is embedded within the form, not a separate step.

One workflow, one submission. Any custom risk assessment is completed as part of the DV Supplemental — no switching between forms or tools.

Workflow-driven smart data entry — only relevant fields appear based on prior answers.

Conditional logic drives the entire form — whether it's child information, strangulation supplements, firearm details, affidavits, or any other section. Relevant fields appear automatically; irrelevant ones don't. Pre-populated fields mean data entered once flows throughout the entire form.

Body Abuse Mark Canvas & Photo Documentation — digital injury documentation on scene.

Mark injury locations directly on a digital body diagram for both survivor and suspect/offender. Upload photographs with timestamps — all captured and stored as part of the official incident record.

Intelligent data sharing — the right information reaches the right stakeholder automatically.

Each stakeholder receives exactly what they need — and nothing they don't. Record segmentation is configured per jurisdiction, ensuring the right data reaches the right party automatically. One submission — no manual transfers, no duplicate reports.

Fully customizable — conforms to your agency's existing DV packet, terminology, and required fields.

No ripping and replacing your current workflows. HART™ DV Supplemental is configured to match how your agency already operates, with the added benefit of smart automation and real-time data sharing.

County Connect™

Unites the criminal and social justice stakeholders through data sharing, multi-agency access, and real-time alerts.

HART™ DV Supplemental

Available as part of the HART platform. Pricing based on agency size and contract terms.
