

Complete strangulation documentation. Built into HART.

HART™ Strangulation is a comprehensive strangulation supplemental module that can be incorporated into any HART DV risk assessment or embedded directly within the HART™ DV Supplemental — capturing the detailed documentation that strangulation cases demand.

Built to match your agency's existing strangulation forms and protocols — fully customizable.

HART™ Strangulation is configured to replicate your agency's current strangulation documentation. Don't have a strangulation form yet? Forseti maintains relationships with many of the nation's leading DV researchers and can help your agency develop one — purpose-built for your jurisdiction.

Flexible deployment — standalone with a DV risk assessment or embedded within HART™ DV Supplemental.

HART™ Strangulation can be deployed three ways: as a standalone supplemental, paired with a DV Risk Assessment, or embedded directly within the HART™ DV Supplemental — configured to match your agency's workflow.

Workflow-driven smart form — conditional logic ensures relevant fields populate automatically.

Smart fields appear based on prior answers. Assessors are guided through the form efficiently — capturing only what's applicable to the incident without navigating irrelevant sections.

Fully customizable — conforms to your agency's existing strangulation documentation protocols.

Every field, section, and response option can be configured to match your jurisdiction's requirements. HART™ Strangulation adapts to how your agency already works — not the other way around.

Intelligent data sharing — strangulation data is routed to the right stakeholders automatically.

Each stakeholder receives exactly what they need — configured per jurisdiction. One submission, no manual transfers, no duplicate reports.

County Connect™

Unites the criminal and social justice stakeholders through data sharing, multi-agency access, and real-time alerts.

HART™ Strangulation

Pricing is based on agency size, contract terms, and deployment scope.
