

## Make sense of your data.

Turn the assessment data your agency already collects into real-time dashboards, exportable reports, and grant-ready analytics — automatically, with no extra data entry.

### Forseti Managed Analytics — expert data analysis and custom reporting as a service.

Forseti analysts review your data and produce a detailed, fully tailored analytics package — formatted to your needs, delivered at the cadence you choose (monthly, quarterly, bi-annually, or annually). Analysis available at the local, county, or state level.

### Real-time KPI Dashboard — automatically updated as new data is entered into HART.

Live totals for assessments, risk levels, referrals, and survivor outcomes. No manual updates required.

### LEIF aggregates data regardless of when or by whom it was entered into HART.

Whether data is entered on scene, by a victim services unit, or by DVSP staff — LEIF captures it all in one place.

### Built for grant reporting — track exactly what funders ask for.

Survivor-advocate connections, referral outcomes, services provided, demographic breakdowns, and risk trends.

### One-click PDF export — filtered, branded, and ready to submit.

Filter by date range and org unit, then export a formatted report. No spreadsheets, no extra steps.

## County Connect™

Unites the criminal and social justice stakeholders through data sharing, multi-agency access, and real-time alerts.

### LEIF™

Pricing is based on agency size, contract terms, and deployment scope.

### Contact Forseti for pricing

Multi-agency & statewide discounts available

\* LEIF™ is a separate product and is not included in a standard HART or MNADV LAP 2.0 subscription. Contact Forseti for pricing details.
