Tile Fixing instruction:

Check the wall for its smoothness, flatness, plumb and ensure it is free from oily films wall papers etc. Deposit a good quality ceramic adhesive evenly on the wall with the help of notched spreader start fixing the tile from a corner. Use only rubber mallet to ensure good contact of tile with the wall and the tile nearby. Leveling is to set the tiles. Fill the gaps between tiles with good sealing material using sponge or squeeze. Remove excess material deposition. Cutting and drilling of tiles requires proper skilled hands to carry out the job. For hole drilling, location is to be determine, always use masonry drill bits with minimum cutting speed. Curve cutting may need a template of the curve desired, reproduce the curve on the tile and cut carefully.

* The information contained in this catalogue are accurate as possible, But cannot be considered as legally binding. The Company reserves the right to make any modification that become necessary due to production to production requirement. The colours of tiles are as possible to the actual colours, within the limit allowed by the printing process.
