EXPERT REPUTATION MANAGEMENT

Business Digital Footprint

Created by NetReputation

Business Digital Footprint

A business's digital footprint begins with establishing a strong online presence for the same reasons a project starts with a solid foundation. Just as a robust foundation guides the success of a project, a well-crafted digital footprint sets the course for effective online visibility and reputation management. By building a comprehensive and positive digital footprint, you create the essential framework for shaping and enhancing your business's online image.

“Everything you do now ends up in your permanent record. The best plan is to overload Google with a long tail of good stuff and to always act as if you're on Candid Camera, because you are.

Seth Godin
