

Water Street Brewery • Oak Creek, Wisconsin

Water Street Brewery was one of the first new buildings in Oak Creek at the Drexel Town Square development. This long running brew pub is the fourth location for the group. It features exposed structural steel to emulate the sense of character and time of an aged warehouse building. Also showcases an impressive one-of-a-kind beer memorabilia throughout the restaurant. The main bar is completely customized to the space as well as all the seating and tables to complete the design. The brewery area of the building is also a main feature as you enter the brew pub/restaurant. The project was design/build construction in collaboration with ownership.

Owner:

Water Street Brewery
