

Executives spend 72% of their time in meetings.

Yet most decisions still take months.

61% of executive decision time is ineffective — McKinsey

Most executive meetings are not built to decide.

They are designed for:

Status Updates

Presentation Reviews

Information Sharing

This is how Decision Latency is created.

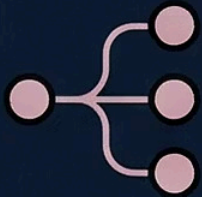

AI can fix Decision Latency — if applied correctly.

Summarize pre-reads before meetings

Surface key risks and trade-offs

Simulate strategic scenarios

Focus meeting time on real decisions

Less analysis in the room. More decisions made.

The opportunity is not AI adoption.

It is AI-enabled leadership decision systems.

Without a decision system, AI adds more dashboards, more options – and the same slow decisions.

From AI Investment to Business Outcomes.
