- Telecomm
- CCTV
- Access Control
- Visitor Entry
- AOC/AOR - Rough In & Trim
- Fire Alarm - Rough In & Trim
- Smoke Control - Rough In & Trim
- A/V

CONTRACT AMOUNT
\$1,428,132

OVERVIEW

AMLI Remond is near the heart of downtown, offering Redmond apartments with unrivaled convenience. The Downtown Redmond light rail station is just a short walk from home, giving you access to the light rail network and seamless commutes. It is close proximity to the sprawling Marymoor Park.

DESIGN

This project represents our most extensive Audio/Video endeavor for BOLD so far. It enabled our engineering team to develop several comprehensive systems tailored to meet customer needs, including music rooms, fitness areas, indoor and outdoor entertainment spaces. The use of cutting-edge technology ensured optimal performance and reliability.

CONSTRUCTION

When BOLD became involved in this project, the customer had already engaged another company for fire components and systems. However, this did not prevent BOLD from successfully completing all the rough-in work and boxing for the fire alarm system in the project. Our team demonstrated flexibility and expertise, seamlessly integrating our work with the existing plans.

CHALLENGES & ACHIEVEMENTS

One of the challenges we faced in this project was that the final fire schedule coincided with the closing of another project in a different city. We addressed this by ensuring that we did not double book our resources and that both projects were prepared and cleared for finals as planned. This helped to minimize any further scheduling conflicts, and lead to commissioned buildings on time.
