- AOC/AOR
- Fire Alarm
- Smoke Control

### SYSTEMS INSTALLED

- AOC/AOR
- Fire Alarm
- Smoke Control

**CONTRACT AMOUNT**  
**\$120,000**

### OVERVIEW

Located in downtown Everett near the waterfront, The WAVE Apartments embody modern Northwest design with a focus on high-density livability and clean, contemporary aesthetics. Thoughtfully designed units feature expansive windows and a timeless material palette inspired by the Pacific Northwest.

A spacious rooftop deck offers unobstructed 360-degree views of the Olympic and Cascade Mountains, as well as the Puget Sound, enhancing the overall resident experience.

### DESIGN

While the design scope for this project aligned with BOLD's core expertise, it provided a valuable opportunity to collaborate with a new smoke control consultant. This partnership enhanced coordination across disciplines and brought fresh perspective to system integration. BOLD leveraged this collaboration to further refine system performance and ensure full compliance with all life safety requirements.

### CONSTRUCTION

BOLD was contracted to design and install the fire alarm system at The WAVE. With a focused project scope, our team efficiently met all design milestones and project timelines, ultimately delivering the system ahead of schedule. This streamlined approach allowed for seamless coordination with other trades and minimized potential delays. The project highlights BOLD's ability to execute efficiently while maintaining high standards.

### PRODUCTS USED:

- Kidde Fire Alarm
