MODULAR WHEELHEAD SYSTEMS — COMPACT AND INNOVATIVE

WHEELHEAD

The ingenious concept of the modular wheelhead allows 10 different wheelhead variants with up to 3 tool positions and one measuring head position. Each individual position is arranged in such a way that a maximum in collision-free operation is guaranteed. Combined with large axis paths, an optimum in flexibility is achieved in the machining of workpieces of different sizes.

- External grinding with water-cooled motor spindles and 11.5 kW power
- Special oil lubrication guarantees long service life
- Grinding wheel dimensions up to $\varnothing 500 \times 100$ mm
- High-frequency internal grinding spindles, available as grease-lubricated or oil-air-lubricated models
- 150 mm mounting bore allows internal grinding spindles with large radial rigidity

INTERNAL GRINDING / SWIVEL DEVICES / ACCESSORIES

SWIVEL DEVICES

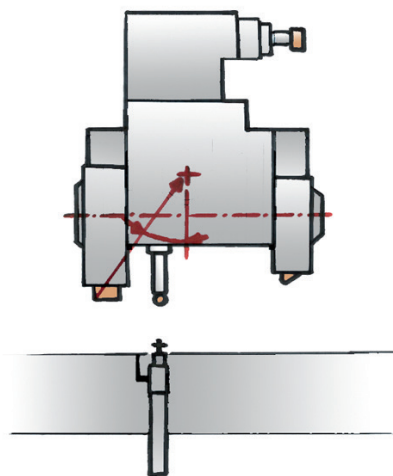

Two versions are available for positioning the wheelhead (tool change time approx. 5s):

- 1° indexing with automatic drive or
- B-axis with direct drive with resolution on of 0.00002° and distortion-free clamping incl. KEL-SET (patented grinding wheel measurement)

ACCESSORIES

- Tactile measuring head, fastened rigidly on wheelhead, for active measuring tasks
- Integrated lifting system for grinding wheel changeover and for lifting table assemblies; saves having a crane at the machine
- Various steady-rests, also including guiding steady-rests for grinding

KEL-SET

INTERNAL GRINDING ATTACHMENT

- Grease-lubricated HF internal grinding spindle 6'000 - 40'000 min⁻¹ 10'000 - 60'000 min⁻¹

FANUC CONTROL SYSTEM 31i-B WITH KELLENBERGER HMI

The BLUE Solution user interface from KELLENBERGER has the central focus on simple and intuitive operation. All interactions are carried out by gestures on the 19" touch display. The latest generation of a reliable FANUC 31i-B control runs in the background.

BLUE SOLUTION

The user interface was developed explicitly for grinding by our specialists in cooperation with customers. BLUE Solution supports users regardless of their level of experience in all important steps from setup to production.

BLACK CAM SOLUTION

With the additional BLACK CAM Solution software, NC programs for grinding and dressing of profiles and threads can be generated, simulated and analyzed.

The CAD-CAM software supports the structured creation, processing and management of all documents belonging to a workpiece.

INDUSTRY 4.0

The Security Interface ensures communication according to the highest IT security standard between the machine and the production network.

The optional Remote Diagnostic module simplifies efficient diagnosis in case of service and thus reduces downtimes.

The machine is prepared for Industry 4.0. With the ComGateway, which has a standard OPC-UA server, extensive information on process and machine status can be exchanged.
