

## **American Women's Political Party**

### **Our Resolution 12/6/2023**

We, the American Women's Political Party, are an association wishing to create a substantial way to bring women forward as leaders in American Politics. To form a political party that organizes women in every county, city, state and across the nation, so that our rights as women, citizens, and family members, are brought to the forefront by a collective body of women voters, and elected officers, to bring our lives full circle, as the embodiment of actualizing goodness, peace, wisdom and truth in the lives of those living in America.

We will be elected to every office, and serve our communities with a consensus of the highest ethics, intelligence, grace, and satisfaction to bring forth a philosophy, that shines from the hearts of women everywhere, in this great country, and beyond. Women will rise, and come forth, now, join with each other to bring about a change, in not just politics, but throughout this land.

We will monopolize with our hearts to set forth a message, a showing, an energy that absorbs in every soul throughout our communities because we now have the power to rise up in ourselves and set a landscape that looks like a bridge to not just heaven but to the sites of our actions, scooping up the people with confidence and appreciation that we are here on this day together, as we see a scene of compromise and wisdom, focusing on what we will become.

We will not just pass legislation that protects us, our children and our families, but we will satisfy our lives in ways that educate, substantiate, promulgate a message that includes everyone, because that is the essence of our democracy and constitution. Just like a family, we will not stand alone as individuals, but with one another from every background, age group, circumstance, situation, diverse as we all are, we will make an agreement with each other to start a movement that catapults us women in a new direction where, we lead, and never follow.

We will lead, serve and never be guided by the political machine that exists in chaos and greed, money and despair, where lives are left in the gutter by actions of seasoned politicians who rake in favors, and believe their constituency lives, below them, not above them.

A woman will no longer fear for her safety, or pledge allegiance to a life that no longer protects her. Women have the right to their bodies, their minds, their decisions, their possessions, and should live in a nation that raises her up, not a nation that tears her down.

Elected to every office, she will pass local, state and federal laws. She will be seen as equal in the eyes of the constitution, but also in the eyes of her peers, her children and her family. Women will work together to right the wrongs of history, resist the traps of fraud, and uncouth practices that have sprouted up in American politics, American business, and American society.

She will stop the chaos, stop letting two dominating parties, leave her behind, dirty up the waters, kill her children, sisters and brothers, fathers and mothers, and tear down the natural environment that makes her more, not less. She will care for her fellow citizens, her natural environment, without the destruction of big business, or billionaires that monopolize the political scene. The chaos will be lost, once she steps forward into the future, as leaders, spreading the message that women are here to clean house, and bond in solidarity. We will stand up for our rights, our freedom, our democracy, our constitution and our institutions. We are more capable and ready than any other time in history.

The **American Women's Political Party** will bring about a light, an essence and a rewarding satisfaction to work in unison with men who believe in women as leaders. We will listen, debate, guide, and bring forth ideas that represent each American life. We will set forth a practical guide to our movement so that it represents each one of us, together, not just in politics but society.

May we always be united!
