

A person in a white, textured costume is holding a large, glowing orange orb with a ring of lights around its equator. The scene is dimly lit with a strong red ambient light. In the background, there are blurred lights and a wall with graffiti. The text "Empirik's Preview" is overlaid in the center.

# Empirik's Preview

You're looking  
for a way to see  
where your eyes  
can't be. You're  
given a choice...  
to give up your  
body and see  
all, or keep  
yourself with a  
limited will.  
You can see  
where your eyes  
can't be, it just  
needs a little  
help from me.

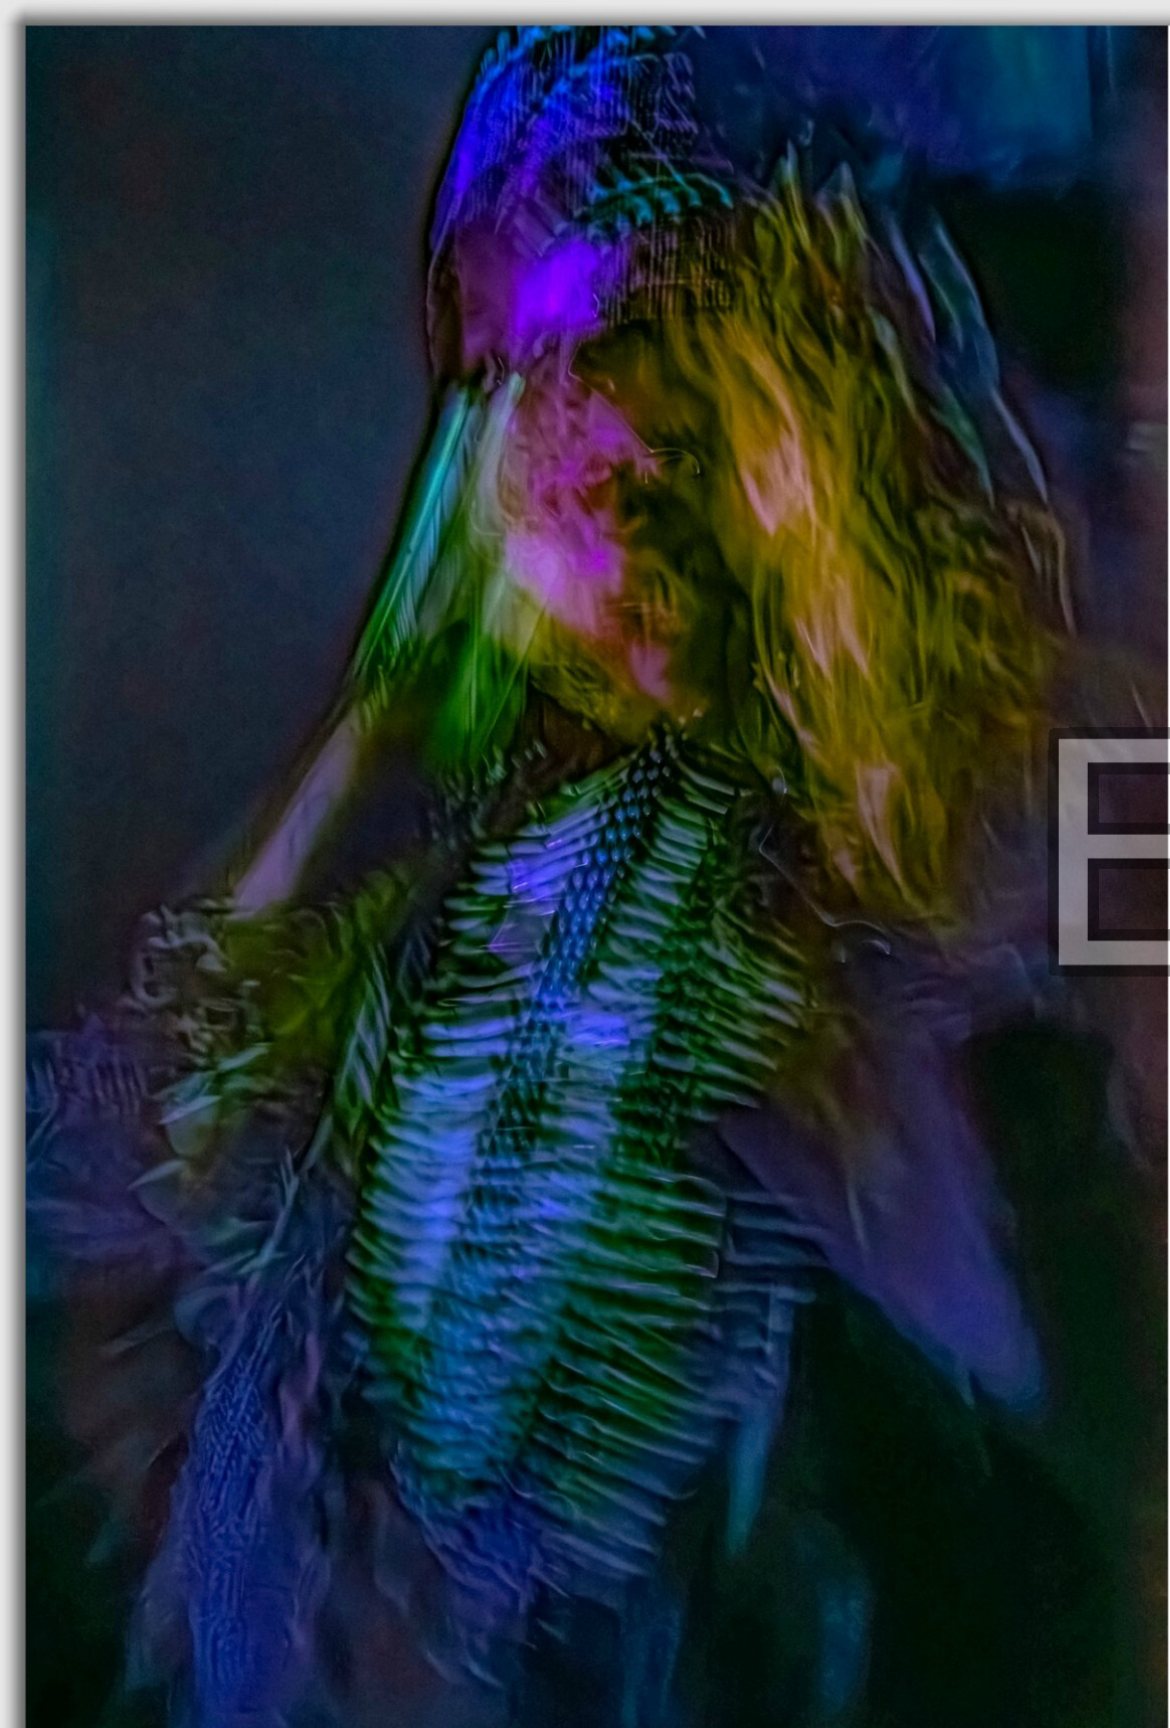

Two Acrylic Balls, my backyard fire pit, and manual focal length adjustment long exposure macro photography opened a inter-dimensional portal to active quantum energy in real time.

Empirik's Preview

Remember that you can always dance. This Lenticular dip-tic photograph taken at a night club in Dallas is proof to believe that it helps explain only what you define it to, and She'll still dance for you.
