Bond Effective Date

Our client, **Principal** has requested that we, **Surety Company 1**, confirm our relationship with **Principal**, provide an indication of surety capacity available and confirm that **Surety Company 1** can operate as needed utilizing the International Digital Ecosystem System Architecture (IDEA).

Surety Company 1 confirms it would entertain extending surety credit up to **Surety Program Single Project Capacity** and **Surety Program Total Capacity**, subject to underwriting at the time of the request.

Surety Company 1 and/or its surety broker **Principal Surety Broker** confirms it can:

1. Issue digital bonds that align with the International Digital Ecosystem Architecture (IDEA)
2. Record **Surety Company 1** digital surety bonds in an industry adopted Surety Validation and Verification platform.
3. Receive email and/or API communications from the SRC Surety Based Risk Management platform.
4. Enable project monitoring with API access to project platform and **Project URL**.

This indication is not a commitment to provide surety now or in the future.

The surety has no obligation to any party for reliance on this indication.
