Subject: WC Solutions for Dr. Nelson

Date: Fri, Feb 15, 2019 3:20 pm

Attachments: WC Current Site & Proposal.pdf (1922K)

Dr Nelson,

Here are the items that we will address tomorrow along with other items that the community brings up.

Waste Connections Community Issues: Solutions

- Smell

1. Odor control system installed in the transfer station
2. Movement of trucks and bins further from the residential properties

- Site Appearance

1. Landscape screen between residential properties and current site (proposal: trees, shrubs and 6ft sight proof fence)
2. Brand new office and truck maintenance facility that allows for better management practices
3. Landscaping along Brooks rd. in front of new office and truck maintenance facility

- Loose trash/debris off property

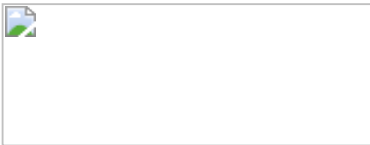

1. Fence screen material installed along all exterior fences to keep loose items onsite
2. Better management practices of the property once the new office and truck maintenance facility are built on the adjacent property

- Noise

1. Indoor truck maintenance facility ensures no speakers are outdoors during operational hours
2. Truck parking moved further from residential properties
