

Straight Shot Labradors... and our recommendation for **NuVet Plus** (1 wafer) (to all past and current puppy buyers), an immunity protection for life. As well as **NuJoint Plus**, growth and development protection! Please have your product ordered prior to puppy pickup.

Due to the varying kinds of different environmental conditions that puppies meet; the terms of this guarantee will not be honored unless they're given NuVet Joint Plus, as directed by the manufacturer, for the entire guarantee period of 2 years. Failure to do so will render this guarantee null and void except prohibited by law. However, because all puppies have immune systems that take time to mature, and there are sooo many varieties of foods, we also HIGHLY recommend NuVet Plus as a lifetime dog immunity supplement treat as well!

NuJoint Plus (180 a bottle) (1-2 per day). It is a natural, nutrient-rich hip and joint supplement compounded for maximum potency. It is one of the best Glucosamine and Chondroitin supplements on the market. Both products are manufactured in a human pharmaceutical FDA registered lab. **NuJoint Plus**, by itself, in general, works better when combined with **NuVet Plus**. NuVet Plus accelerates the function of Glucosamine and Chondroitin.

Congratulations on your new puppy from **Straight Shot Labradors!** More important than ever before, please continue your dog on an immunity support system – not just for puppies: **NuVet Plus** 90 day supply is our top lifetime recommendation as an immunity support supplement!

The best way to order is to call NuVet Laboratories from 7AM-5PM Mon- Friday PST. Ask them for their PET PREFERRED PROGRAM.

Please provide our code **91591**– not available in the stores. Their proceeds go back to the support of breeders' programs to provide all breeders with an excellent product for support of:

1. Bulges, growths
2. Enhances cell, gland and organ function
3. Expands mobility and flexibility
4. Glucose related
5. Helps reduce bulges, mass and growths
6. Hypersensitivity
7. Improved energy
8. Improves blood sugar levels within normal levels

9. Improves digestion and nutrient absorption
10. Improves glucose production
11. Mass
12. Mood balance
13. Paw licking
14. Promotes quality of life
15. Reduces drainage or discharge
16. Sensitivities
17. Skin condition Supports a healthy and shiny skin and coat
18. Quality of life
19. Different issues in the body

We HIGHLY recommend (and mandate for our guarantee) that each puppy family purchases their first bottle of **NuJoint Plus** prior to puppy pick up. Besides **NuJoint Plus**, your puppy has already been on **NuVet Plus** and though we don't require it, you should continue throughout its puppyhood, this product is a lifetime recommendation! Attached is the electronic brochure with a breakdown on the ingredients on NuVet Plus. Great product for the puppies, dogs in training and in high performance! This is offered exclusively offered through 1,000+ Vets and 10,000 + breeders with over a million pets on this product.

As a dog breeder, animal health is my TOP priority. We love **NuVet Plus immune system builder** so much that we are asking you to purchase NuVet Plus prior to getting your new puppy for this reason: This is a powerful immune support supplement. That's why we recommend NuVet Plus as the best lifetime product. The product will help keep your environment safer, your puppy healthier, enhancing cells, glands and organ functions. The wafer is so soft you can break it up with your hands and use it for a training treat! Please bridge the supplement day to day.

NuVet Plus is made with natural ingredients; no artificial flavors, artificial fillers, artificial binders or grains. This gives it superior absorption and utilization in the body, allowing the ingredients to more effectively absorbed through the cellular walls. Healthy cells=healthy dogs! NuVet Plus supplements are not synthetic.

This is not just a vitamin. It's an immune system builder with a precise balance of vitamins, minerals, omega fatty acids, amino acids and high-potency antioxidants. That's why it works so well through all three stages of a dog's life.

For puppies - Fills the immunity gap all puppies experience. Shortly after birth maternal antibody effectiveness is greatly reduced. By 8 weeks your puppy's immune system is at a vulnerable point. Once in their new home, the immune system is weakened by the stress of adoption and exposure to novel bacteria and toxins in their environment. This is also when the vaccine series is started. Vaccines are most effective if the immune system can respond properly. Starting NuVet Plus now is important to helping your puppy grow into a healthy adult.

For dogs in their prime – Helps improve the luster of their skin and coat while providing the necessary antioxidants, amino acids, vitamins, mineral and more to sustain their body's peak performance during the prime of their lives. Can help increase energy and help with mood, sensitivities, and quality of life.

For older dogs – Helps provide the nutritional requirements to help them live long, happy, and productive lives in their senior years. Supports blood sugar levels within normal levels. Improves glucose production.

NuVet is not available in stores, and is only available to the general public with an order code from an authorized pet professional.

For your convenience, you may order directly from the manufacturer by calling 800-474-7044 and using **Order Code: 91591 and ask for the **Pet Preferred Program**. Please feel free to also order online: www.nuvet.com/91591**
