

In Year 1

We started our science week by being live on a farm with NFU education. We learnt about how Farmer Fiona keeps her animals alive, keep all her vehicles running and grows her crops.

Next, we discussed farms of the future and we learnt that Farm Urban in Liverpool are growing crops differently. We looked at Year 5's project from last year and how they grew basil and mushrooms differently

Finally, this inspired us to think how farms in the future may look. We designed them using pen and paper, we built them using Lego. Then we used the Multicraft app to build our farms.

We really enjoyed our science week
