Great Crosby Catholic Primary School Administering Medicine Policy: Version 2024:1 Date: 19.06.24

## POLICY FOR THE ADMINISTRATION OF MEDICATION IN SCHOOL.

The Governing Board and staff of Great Crosby Catholic Primary School wish to ensure that pupils with medication needs receive appropriate care and support at school. The Headteacher will accept responsibility in principle for members of the school staff giving or supervising pupils taking medication during the school day where those members of staff have volunteered to do so.

Please note that parents should keep their children at home if acutely unwell, infectious or have been advised to do so by a doctor or Healthcare practitioner.

Parents/Carers are responsible for providing the Headteacher with information regarding the pupil's condition and medication.

Medication will not be accepted in school without complete written and signed instructions from the parent/carer.

If antibiotics need to be administered three times a day these should not be sent into school as they can be given at home in the morning, after school and at bedtime. If antibiotics need to be administered more frequently than that, they can be brought into school and the Parental Agreement to Administer Medicine must be completed.

In an emergency, the parent/carer who has parental custody that day will be contacted and offered the option of school providing some medicine. Time administered will be on the accident slip or a notification message will be sent to the parents/carers.

Only reasonable quantities of medication should be supplied to the school (for example, a maximum of four-six weeks supply at any one time).

Where the pupil travels with an escort, parents/carers should ensure the escort has written instructions relating to any medication sent with the pupil, including medication for administration during respite care.

Each item of medication must be delivered to a member of the Admin team, in normal circumstances by the parent/carer, <u>in a secure and labelled container as originally dispensed</u>. Each item of medication must be clearly labelled with the following information:

- . Pupil's Name.
- Name of medication.
- . Dosage.
- . Frequency of administration.
- . Date of dispensing.
- . Storage requirements (if important).
- . Expiry date.

## The school will not accept items of medication in unlabelled containers.

Medication will be kept in a secure place, out of the reach of pupils. Unless otherwise indicated all medication to be administered in school will be kept in a locked medicine cabinet or in a designated medicines fridge

The school will keep records, which they will have available for parents/carers, if requested.

If children refuse to take medicines, staff will not force them to do so, and will inform the parents/carers of the refusal, as a matter of urgency, on the same day. If a refusal to take medicines results in an emergency, the school's emergency procedures will be followed.

It is the responsibility of parents/carers to notify the school in writing if the pupil's need for medication has ceased.

It is the responsibility of parents/carers to renew the medication when supplies are running low and to ensure that the medication supplied is within its expiry date.

The school will not make changes to dosages on parental instructions. A letter confirming change of dosage from a medical practitioner is required.

School staff will not dispose of medicines. Medicines, which are in use and in date, should be collected by the parent at the end of each school year. Date expired medicines or those no longer required for treatment will be returned immediately to the parent for transfer to a community pharmacist for safe disposal.

We know there are occasions when your child is well enough to be in school, but might need some medication to help with symptoms such as a cough, a cold or hayfever. In these cases, Calpol, Ibuprofen, cough medicine, Piriton etc. can be brought into school, but it must be clearly labelled with your child's name and the dosage must be clear. These medications are short term and clearly state that if symptoms persist, you should seek medical advice. When your child is feeling better, these medicines should be collected from the office and taken home. At the end of each term we will return any medicines of this nature that have not been collected.

For each pupil with long-term or complex medication needs, the Headteacher or designated member of the Leadership team, will ensure that an Individual Healthcare Plan and Protocol is drawn up, in conjunction with the appropriate health professionals.

Where it is appropriate to do so, pupils will be encouraged to administer their own medication, if necessary under staff supervision. Parents/Carers will be asked to confirm in writing if they wish their child to carry their medication with them in school.

Staff who volunteer to assist in the administration of medication will receive appropriate training/guidance through arrangements made with the School Health Service, or other specialist Health practitioners.

The school will make every effort to continue the administration of medication to a pupil whilst on trips away from the school premises, even if additional arrangements might be required.

All staff will be made aware of the procedures to be followed in the event of an emergency.

Great Crosby Catholic Primary School Administering Medicine Policy: Version 2024:1 Date: 19.06.24 The table below contains advice that members of staff can refer to when administering medicines to pupils in school. It is based on the Department for Education's <u>statutory guidance on supporting pupils at school with medical conditions</u>.

Do		Do not	
✓ ✓ ✓ ✓ ✓ ✓ ✓ ✓ ✓ ✓ ✓ ✓ ✓ ✓	Remember that any member of school staff may be asked to provide support to pupils with medical conditions, but they are not obliged to do so  Check the maximum dosage and when the previous dosage was taken before administering medicine  Keep a record of all medicines administered. The record should state the type of medicine, the dosage, how and when it was administered, and the member of staff who administered it  Inform Parents/Carers if their child has received medicine or been unwell at school  Store medicine safely  Ensure that the child knows where his or her medicine is kept, and can access it immediately  If school provides medication following verbal permission, it will be noted on the accident slip or a notification message will be sent to the parents/carers to advise time administered	<ul> <li>Give prescription medicines or undertake healthcare procedures without appropriate training</li> <li>Accept medicines unless they are indate, labelled, in the original container and accompanied by instructions</li> <li>Give prescription or non-prescription medicine to a child under 16 without written parental consent, unless in exceptional circumstances</li> <li>Give medicine containing aspirin to a child under 16 unless it has been prescribed by a doctor</li> <li>Lock away emergency medicine or devices such as adrenaline pens or asthma inhalers</li> <li>Force a child to take their medicine. the child refuses to take it, follow the procedure in the individual healthcar plan and inform their Parents/Carers</li> </ul>	n t a If
