PROFESSIONAL SUMMARY

Highly skilled and experienced Speech-Language Pathologist with over 35 years of expertise in evaluating and treating speech, language, cognitive, and swallowing disorders across adult and pediatric populations. Proven ability to manage complex cases, develop innovative therapy programs, and supervise clinical trainees. Dedicated to improving patient outcomes through personalized care, evidence-based practices, and interdisciplinary collaboration. Licensed and certified in multiple states, ensuring comprehensive and accessible services to diverse populations.

PROFESSIONAL EXPERIENCE

Speech Therapy Associates (STA), Las Vegas, NV

Owner, Private Practice

(Since 1986)

- **Adult Population:** Evaluation and treatment for aphasia, apraxia, dysarthria, dysphagia, TBI, cognitive disorders, degenerative neurological diseases, and voice disorders in acute care, rehabilitation, and outpatient settings.
- **Pediatric Population:** Evaluation and treatment for articulation and language disorders, auditory processing deficits, fluency, voice issues, cleft lip and palate, apraxia, autism, feeding and swallowing disorders, developmental delays, and TBI.
- Conducts 500+ Modified Barium Swallow Studies (MBSS) annually.
- Certified Vital Stim (NMES) provider identified as best practice in the treatment of swallowing disorders (Since 2005).
- Supervised graduate students and clinical fellows.
- **Cognitive Rehabilitation Expert:** Specialized in the assessment and treatment of individuals with traumatic brain injury (TBI) and acquired brain injuries. Expertise in developing and implementing cognitive-linguistic rehabilitation plans tailored to improve patient outcomes in areas such as memory, executive functioning, and communication. Frequently retained as an expert witness in personal injury cases nationwide, providing authoritative testimony, which has contributed to significant financial outcomes. Skilled in collaborating with legal teams to provide clear, evidence-based insights on the cognitive and communicative impact of injuries.
