

Specializing in Cognitive-Linguistic Assessments and Treatment for Clients with Traumatic Brain Injuries and Acquired Brain Injuries

As pioneers in the field of Traumatic Brain Injury (TBI) and Acquired Brain Injury (ABI) treatment, we are dedicated to revolutionizing the care we provide to clients facing these challenging conditions. We understand the complexities of TBI and ABI cases and the critical role that personal injury attorneys play in advocating for their clients. Our expertise, coupled with a compassionate approach, ensures that we not only deliver exceptional treatment but also support your efforts in securing the best outcomes for your clients.

At Speech Therapy Associates, we specialize in comprehensive cognitive-linguistic assessment and treatment for individuals who have experienced traumatic brain injuries. Our experienced Speech Pathologists are adept at addressing memory deficits, verbal expression difficulties, and other cognitive challenges that arise after a TBI/ABI. We conduct thorough evaluations to accurately assess and understand each client's cognitive functioning, enabling us to tailor evidence-based treatment plans that promote improvement in cognitive skills and enhance quality of life.

We are committed to establishing strong partnerships with legal and medical professionals to ensure that your clients receive the comprehensive cognitive assessments and treatments they deserve. By collaborating, we can effectively aid individuals with traumatic brain injuries in navigating the legal and medical aspects of their recovery journey. Barbara and I are eager to develop relationships with your office and to be the resource your practice seeks for your clients. We work with a variety of Lien Companies that provide services to our clients, alleviating any financial burden associated with treatment.

If you or your clients require expert cognitive evaluation and treatment services, please do not hesitate to reach out. We are here to discuss how we can support your clients in achieving optimal cognitive functioning and overall well-being.

Thank you for considering Speech Therapy Associates as a vital resource for your clients. We look forward to the opportunity to collaborate and provide specialized care for individuals following traumatic brain injuries.
