Velocity[®] ALPHA

HIGH SPEED SURGICAL DRILL SYSTEM

10% more power*

20% smaller*

Reduced thermal warming

*compared to previous Velocity® generation

Launching the Velocity Alpha® attachment series in 2015 was a major milestone for adeor.

A true universal cutter system, one-click easy coupling and built-in telescoping were created to meet the needs of today's OR personnel. We continued to listen to our customers and utilised their feedback and requirements to design a new generation of our electric high speed drill system. Surgeons and nurses emphasized the importance of less thermal warming, ease of use for their equipment and a desire to reduce cables around the operating table. The result is our new Velocity Alpha® system. Reliable, easy to use and packed with unique features.

Der Marktstart der Velocity Alpha® Handstücke in 2015 war ein Meilenstein für adeor. Features wie der Universalfräser, die 1-Klick Kupplung und die eingebaute Teleskopfunktion für Fräser wurden realisiert um den Bedürfnissen der Anwender optimal gerecht zu werden. Das neue Velocity Alpha® System tritt nun an um unseren Anwendern weitere entscheidende Vorteile an die Hand zu geben. Dazu gehört neben einem kabellosen Fußpedal insbesondere eine deutlich reduzierte Erwärmung des Motors unter hoher Belastung.

The universal cutter system

80% less inventory cost / different cutter models

No more cutter identification hassles

Adjustable cutter exposure

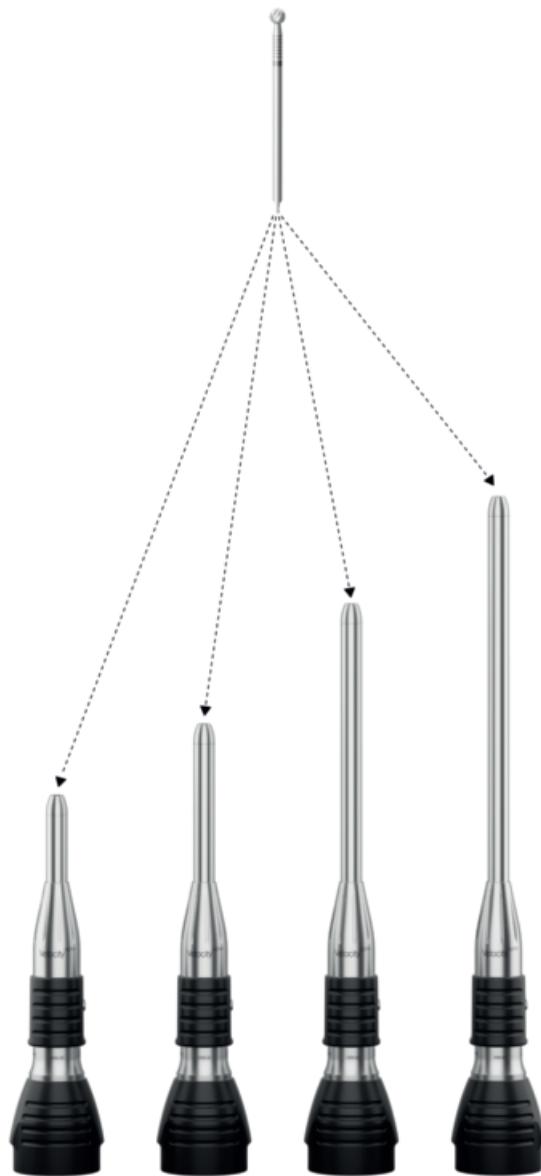

Easiest handling

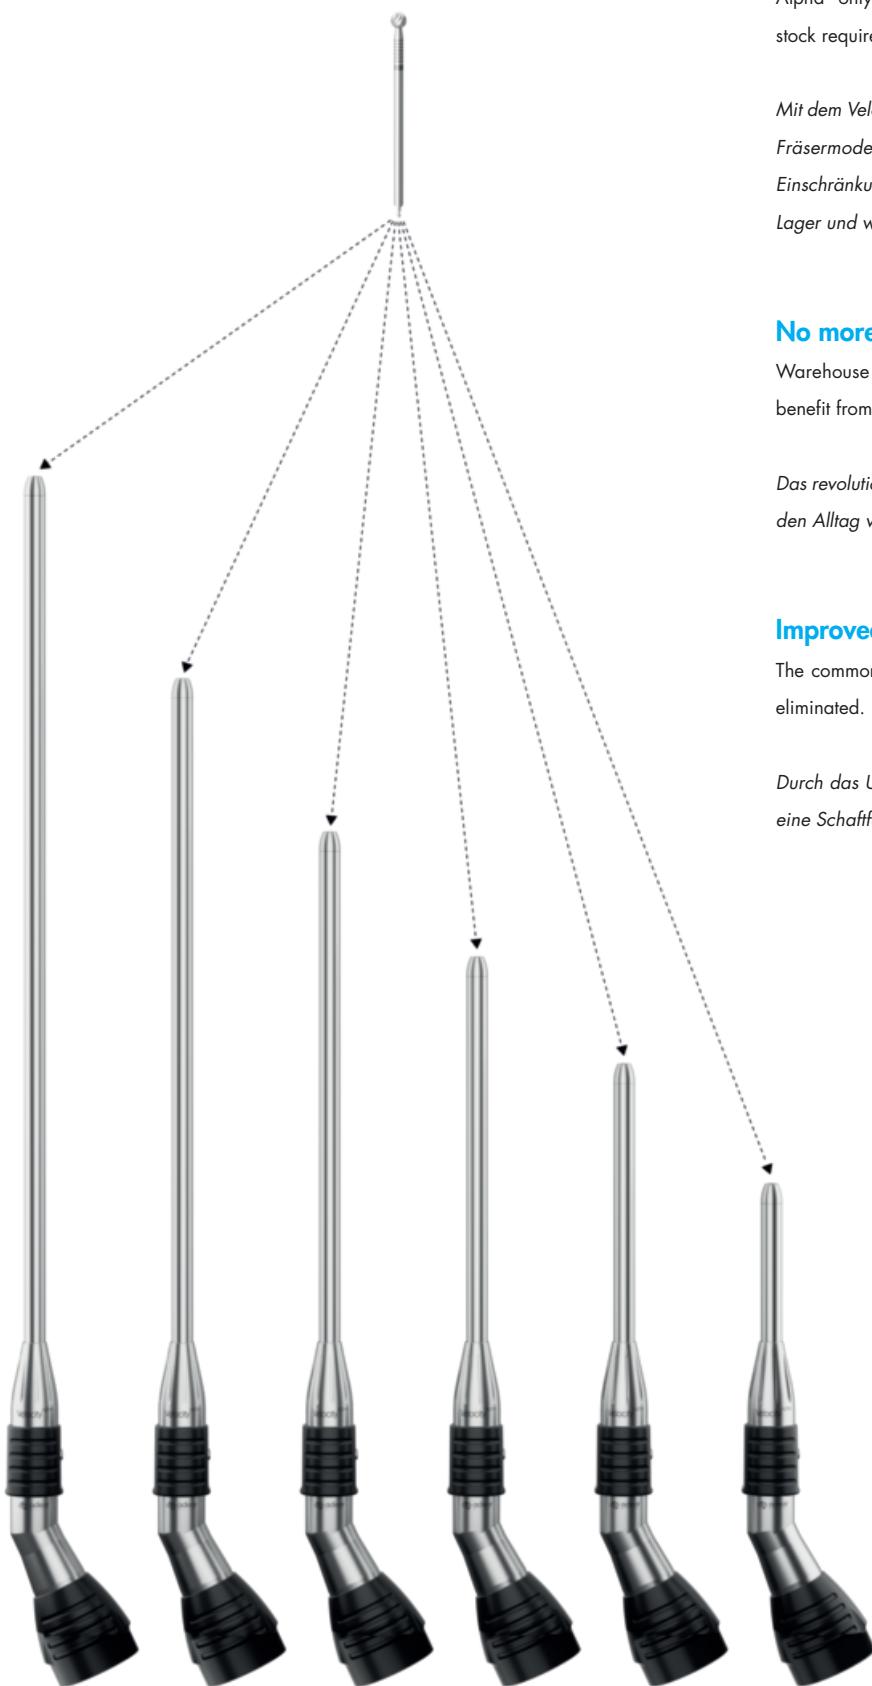

Velocity Alpha[®] Universal Cutter System

One universal cutter for all straight and angled attachments.

Ein Universalfräser für alle geraden und gewinkelten Schaffführungen.

80% less cutter codes and inventory cost

Instead of more than 300 different cutters and product codes, Velocity Alpha® only has 50 codes without compromising variety. This means fewer stock requirements and free cash-flow for the hospital.

Mit dem Velocity Alpha® System konnten wir die Anzahl der verschiedenen Fräsermodelle von bisher 300 auf nur 50 reduzieren. Und das ohne Einschränkungen für den Operateur. Dies bedeutet ein deutlich reduziertes Lager und weniger gebundenes Kapital für das Klinikum.

No more cutter identification

Warehouse managers, nurses, surgeons and purchasing officers will all benefit from the simplicity of the universal cutter design.

Das revolutionäre adeor Velocity Alpha® Universalfräser-System vereinfacht den Alltag von Chirurgen, OP-Schwestern und Einkäufern.

Improved safety

The common risk of using the wrong cutter with the wrong attachment is eliminated.

Durch das Universalfräser-System wird das Risiko, den falschen Fräser für eine Schaffführung zu wählen, ausgeschlossen.

Variable Cutter Exposure

Depending on the procedure, surgical area and other factors, surgeons want cutters to protrude more or less from the attachment. Now, they can select from 8 different positions for each tool (in 1 mm steps).

Je nach Operation und anatomischer Gegebenheit sind verschiedene Ausfahrlängen der Fräser sinnvoll. Mit dem Velocity Alpha[®] System haben Sie die Möglichkeit aus 8 Ausfahrlängen der Fräser zu wählen (in 1 mm Schritten).

Adjustable cutter exposure
Einstellbare Fräserlänge

8 exposure positions in 1 mm steps
8 Ausfahrlängen in 1 mm Schritten

One-Click Coupling

Inserting, removing or changing cutters has never been easier. To insert the tool, simply push the cutter into the attachment until you hear and feel a "click". That's it.

Less training, less risk of errors.

The automatic one-click coupling system saves time, during set-up as well as intra-operatively.

Das Einsetzen von Fräsern und der gesamte Systemaufbau waren nie einfacher. Mit dem Velocity Alpha[®] System genügt ein simples Aufstecken - das ist alles. Ein gut hörbares Klicken signalisiert den korrekten Zusammenbau.

One-Click to connect any cutter or attachment
1-Klick-Verbindung für Fräser und Nosepieces

Straight Attachments

Super slim - packed with unique features.

Velocity Alpha[®] straight attachments are built to last and offer reliable performance without excessive heat, vibration or noise.

Minimale Größe gepaart mit maximalen Features.

Velocity Alpha[®] Schaffführungen zeichnen sich durch minimale Erwärmung, hohe Lebensdauer sowie ein geringes Geräuschniveau aus.

Straight Attachments

Universal Cutter System / 8-Step Telescoping / One-Click Coupling

VMN-XS

extra short attachment, straight (without telescoping)
shaft diameter 5.4 mm
working / total length 22 / 92 mm

VMN-S1

25° angulation, shaft diameter 5.4 mm
working / total length 220 / 300 mm

Craniotomy Attachments

Velocity Alpha[®] duraguards are available in three lengths, either fixed or rotatable. The duraguard design facilitates smooth and fast cutting during craniotomies.

Velocity Alpha[®] Duraguards sind in 3 verschiedenen Längen erhältlich. Fix oder steuerbar. Das Design der Duraguards erleichtert eine schnelle und reibungslose Kraniotomie.

Speed Reducer

The ergonomic Velocity Alpha[®] speed reducer with universal hudson coupling is designed for fast and efficient cranial perforation.

Der ergonomisch geformte Velocity Alpha[®] speed reducer mit Hudson Kupplung wurde für die schnelle und effiziente Trepanation entwickelt.

VMT-102E
speed reducer

ratio 1:64

High Speed Motor

High speed and torque - minimal thermal warming. The Velocity Alpha[®] high speed motor offers reduced dimensions for improved ergonomics, an increase in power and torque but also reduced thermal warming. The motor is designed to easily withstand the daily routine in operating rooms and sterile processing departments.

High Speed und hohes Drehmoment bei minimaler Erwärmung. Der Velocity Alpha[®] High Speed Motor ist deutlich kleiner und stärker ausgelegt als sein Vorgänger. Gleichzeitig konnten Haltbarkeit und Erwärmungsverhalten weiter verbessert werden.

VAM

80.000 rpm
integrated 3.5 m cable

Velocity Alpha[®] Control Unit

The Velocity Alpha[®] control unit combines a simple "plug and play" approach with a vast range of customisation options, including start and stop speed of the motor, foot control settings and more. With 27 in built languages to choose from, the Velocity Alpha[®] unit caters to many nationalities and markets. One of the recurring demands from surgeons and nurses is the wish to reduce cable clutter around the operating table. We answer this demand with the introduction of the wireless foot pedal. Using state-of-the-art wireless technology, surgeons can move around the operating table freely without the risk of tripping.

Die neue Velocity Alpha[®] Steuereinheit kombiniert die Vorteile individueller Einstellbarkeit und intuitiver Bedienung. Der Anwender kann zwischen einer Plug&Play Option mit voreingestellten Standardwerten und der Möglichkeit eines individuell angepassten Anwenderprofils wählen. Das Motor- und Fußpedalverhalten ist einstellbar. Die neue Generation der Velocity Alpha[®] Steuereinheit bietet 27 vorinstallierte Menüsprachen. Dem häufig geäußerten Wunsch nach weniger Kabeln im Operationssaal entsprechen wir mit der Einführung des kabellosen Fußpedals, welches frei im Operationssaal positionierbar ist.

Velocity Alpha® Craniotome Cutters

Meridian™ Cranial Perforators

Unique Benefits

- › Popular design for maximized familiarity
- › Suitable for skull thicknesses as thin as 1 mm
- › Safe release mechanism
- › Suitable for even and uneven bone
- › Universal Hudson fitting
- › Consistent cutting efficiency
- › Different housing colors to easily identify the different models
- › Available in most commonly used sizes

Produktmerkmale

- › Populäres Design erlaubt gewohnte Arbeitsweise
- › Sicherer Auslösemechanismus
- › Einsetzbar bei ebenen und unebenen Schädelknochen
- › Konstante Schneidleistung
- › Universeller Hudsonschaft
- › Startet auch nach Unterbrechung
- › Verfügbar in marktüblichen Standardgrößen
- › Unterschiedliche Gehäusefarben für einfache Identifikation

Velocity Alpha[®] Micro Saws

Velocity Alpha[®] micro saws offer reliable performance for a wide variety of microsurgical, spinal, CMF and orthopedic procedures. Key features of the Velocity Alpha[®] micro saws are:

- > Minimal vibration
- > High cutting efficiency
- > Clean low pressure cutting
- > Integrated and adjustable irrigation
- > Long lifetime
- > Lightweight
- > Slim design
- > Fully compatible with Velocity[®] Alpha high speed motor and control unit

Velocity Alpha[®] Mikrosägen bieten zuverlässige Performance für Anwendungen in den Bereichen Mikrochirurgie, Wirbelsäulenchirurgie, MKG und Orthopädie.

- > Minimale Vibration
- > Hohe Schneidleistung
- > Saubere Schnitte bei minimalem Druck
- > Integrierte und verstellbare Spülung
- > Lange Lebensdauer
- > Geringes Gewicht
- > Schmale Bauform
- > Kompatibel mit Velocity Alpha[®] High Speed Motor und Steuereinheit

Nominal current	0.3 - 0.8 A	0.3 - 1.6 A
Frequency	50 - 60 Hz	50 - 60 Hz
Mains fuse	2 x 250 V - T 1.6 AH	2 x 250 V - T 1.6 AH
Max. power consumption	170 VA	170 VA
Max. mechanical output power	80 W	80 W
Torque level	2.2 ... 88 Ncm	2.2 ... 88 Ncm
Motor speed range	1.000 - 80.000 rpm	1.000 - 80.000 rpm
Irrigation flow rate	25/50/75/100 ml/min	25/50/75/100 ml/min
Dimensions	262 x 291 x 99 mm	262 x 291 x 99 mm
Wireless standard	Bluetooth™ LE	Bluetooth™ LE
Protection class	II	II
Applied part	Type B	Type B
Integrated irrigation pump	yes	yes
Foot control / danger zone M / ANSI/AAMI	AP / IEC 60601-1	AP / IEC 60601-1
Water resistance of foot control / 1 m depth for 1 h	IPX8 / IEC 60529	IPX8 / IEC 60529
Pollution level	2	2
Overvoltage category	II	II
Max. altitude / above sea level	3.000 m	3.000 m
Batteries used with VAFCBT wireless foot control	Standard AA Mignon	Standard AA Mignon
Compatible with thermo washing machines and autoclavable < 135°C / 383°F (motor parts)	yes	yes
Noise level (motor only) acc. to ISO 11498	< 53 dBA	< 53 dBA
