Flexible Clamps **OpInstruments GmbH**

MADE IN GERMANY

OpInstruments GmbH

+49 69 9501 4824 info@opinstru.de www.opinstru.de
Barckhausstr.11, 60325 Frankfurt am Main, Deutschland

Flexible Clamps

For multi-use and aortic cross clamping. The rigid shaft enables tunneling and accurate clamp placement. Can be maneuvered to a location remote of the surgical procedure.

Controlled Strength

- » Comparable in strength to bulkier aortic clamps.
- » Provide greater access, control and flexibility in your procedures.

Ergonomic Advantage

- » An ergonomically designed handle gives you quick release capabilities.
- » Gives you precision instrument ratcheting.

11 - 31601

12-6406 / 12-6005

12-6409 / 12-6009

12 - 6406	with Removable Handle
12 - 6005	without Removable Handle
12 - 6409	with Removable Handle
12 - 6009	without Removable Handle
11 - 31601	Ring-Handled applicator for 12-6406, 12-6005 and 12-6409, 12-6009

MADE IN GERMANY

OpInstruments GmbH

RETRACTOR FIXTURES

For beating heart surgery

- Strong reusable design.
- Superior positioning and articulation.
- Attachable to any sternal retractor system.
- Special interlock-joints for ultimate strength.
- Maximum versatility with interchangeable optional attachments for stabilization, manipulation or retraction.
- Ball-joint connection of attachments provides additional degrees of freedom.
- Partially detachable for ease of cleaning.

Ordering Information

04-5201	Tissue stabilizer- arm, 24cm, working with flexible arm (04 - 9501) or with 7mm Shank diameter Retractor.
04-7001	Tissue stabilizer- arm, 24cm , working with ball head sucker.
04-9501	Retractor flexible arm 24cm. 7mm Shank diameter.

SUCKERS

Suckers are manufactured by Recovre.

010101

- U-shaped sucker with four holes, single use and sterile, spherical joints, could connect with 04-9501 and 04-7001.

010201

- The head of apex sucker is stable and absorbs effectively the apex without myocardial injury..
- Apical-shaped sucker, single use and sterile, spherical joints, should be connect with 04-9501 and 04-7001.

010301

- U-shaped sucker with three holes, single use and sterile, spherical joints, could connect with 04-9501 and 04-7001.

010302

- U-shaped sucker with four holes, single use and sterile, spherical joints, could connect with 04-9501 and 04-7001.

PATENTED TECHNOLOGY

Innovative double arms design and post-negative pressure suction tube

Innovative double arms design

- Is composed of apex and U-shaped suckers ensuring the excellent operability.
- Reduces the cost and burden on patients.
- Meets the different needs of surgery thanks to integrated structure.

Post-negative pressure suction tube

- With channel inside the active arm as airway of the negative pressure provides a better surgical vision.
- Avoids effectively the occlusion by flexible operating angle for a convenient handling.

Locking device

- Fits closer to the retractor.
- Avoids the possible movements of the base.
- Enhances the operating stability by firm fixture.

Flexible connecting arm

- The connecting arm provides optimal stability and flexibility while increasing the operating space.
- According to the needs of surgery, the angle of the connecting arm is arbitrarily adjustable for the anastomosis of various surgical site.

RECOVRE® Heart Stabilizer

WITH INTERCHANGEABLE TIPS

Standard Stabilizer 3-D rotation design

- Base and the main body of the connection, can be adjusted to facilitate the operation.

Trigeminal connection

- According to the needs of surgery, the sucker head can be rotated arbitrarily without sheltering the vision.

Optional suckers

- 010101, 010201, 010301, 010302, 010501, 010601.

MICS Stabilizer Essential for small incision surgery

- Thin rod conversion arm for minimally invasive small incision surgery.
- Unique delivery system transports the fixing plate through a small incision to the target position, without affecting the surgical field of vision.
- Reducing the pain of thoracotomy, accelerating wound healing.

Optional suckers

- 010101, 010201, 010301, 010302, 010501, 010601.
