# OMNIAE, LLC

June, 2026

Omniae, is a safety-focused travel platform designed for women. It addresses the lack of clear reliable safety information, empowering them to make informed decisions and travel with confidence.

## The Core Problem

- **The Safety Information Gap:** Despite making up the majority of global travelers, women lack access to centralized, verified, and real-time safety intelligence
- **Scattered and Macro-Level Data:** Official safety data exists but is highly fragmented, overwhelming, and restricted to macro, country-level overviews. It fails to distill critical, neighborhood-specific nuances vital for female travel safety.
- **The Premium Value Gap:** Millions of high-spending female travelers are forced to manually piece together safety info across disjointed sources.

## Why now?

- **The Solo Travel Surge:** Female solo travel is experiencing global growth, transforming safety from a niche concern into the #1 deciding factor for a \$100B+ demographic
- **The AI Inflection Point:** Generative AI makes it possible to instantly ingest, structure, and localize massive data sets at scale without heavy operational costs.

## Why us?

- **Data Architecture Advantage:** We have designed a scalable framework that synthesizes official country data and traveler reviews into a structured, localized safety scoring system.
- **Speed to Market:** Launching a live Beta MVP with zero heavy research overhead, leveraging agile code to achieve rapid market validation.

## Market Opportunity

64% of Global travelers are women

Safety: The # 1 travel factor for over 66% of women.

80%+ of travel decisions are made by women
