Let us introduce you to our **SMART TANK MONITOR!**

The SMART TANK MONITOR is a telemetry unit that easily attaches to your propane tank and monitors the level of propane remaining in the tank. It transmits the reading on a daily basis so that you and we as your provider are always up to date on your current propane level.

TAKE THE GUESS WORK OUT OF YOUR HEATING NEEDS

Some features are:

- FREE mobile application
- User-friendly interface
- Track tank-levels in real time
- Customizable level alerts
- Consult usage history
- Request refill

The tank monitor keeps track of the level of propane in your tank so that you should never have to go out and check your tank – it's all on your phone and email. It will alert you when it's time to think about getting a refill—especially in winter. No more trudging through the snow, or worrying about your propane level while on holidays or travelling, just take a quick look on your phone and put your mind at ease.

As long as your propane tank is compatible, which we can determine for you, we offer these tank monitors at a reasonable annual rental fee.
